Lampiran : 1 (satu) Berkas
Perihal : Funding Support Program **Joint Research Scheme (JRS)** dari
Konsorsium Southeast and South Asia and Taiwan Universities (SATU)
President's Forum

Yth. : 1. Para Kepala Departemen
2. Para Kepala Pusat penelitian
3. Para Kepala Pusat Kajian
4. Para Manajer Klaster Inovasi
5. Para Kepala Pusat Unggulan IPTEK
Di Lingkungan ITS

Bersama ini kami informasikan funding support program **Joint Research Scheme (JRS)** dari Konsorsium **Southeast and South Asia and Taiwan Universities (SATU) President's Forum**. Institut Teknologi Sepuluh Nopember (ITS) telah menjadi member SATU.

Topik Riset :

Liberal Arts, Management, Sciences, Social Science, Engineering, Electrical Engineering & Computer Science, Planning & Design, Bioscience & Biotechnology, and Medicine in Southeast and South Asia, and multidisciplinary research.

Usulan proposal paling lambat tanggal **22 Maret 2023** melalui laman <https://satu.ncku.edu.tw/> , Permohonan Pengesahan Direktur DRPM ITS bisa diakses melalui <https://linktr.ee/drpm.its> dan konfirmasi melalui 081333250025 (Admin DRPM ITS).

Demikian. atas perhatian dan kerjasamanya kami sampaikan terima kasih.

Surabaya, 27 Pebruari 2023
Direktur Riset dan Pengabdian Kepada
Masyarakat,

Fadlilatul Taufany, S.T., Ph.D.
198107132005011001

Tembusan Yth :

1. Wakil Rektor IV
2. Kepala Bagian Administrasi Umum dan Kearsipan Digital

2023 SATU JOINT RESEARCH SCHEME (JRS)

NEW! 2023 Joint Research Scheme accept PI proposal now until 22 March 2023

About the SATU Joint Research Scheme (JRS)

The SATU Presidents' Forum International Secretariat launched the SATU Joint Research Scheme (or SATU JRS) in 2012 to provide a collaborative platform that facilitates academic research cooperation among SATU member universities. It serves as a matching platform where scholars from different SATU member universities can connect with like-minded researchers and form research collaborations together.

The JRS platform does not provide funding for the matched projects. Each host university may provide funding or alternative types of support to implement a given project.

Aim

The SATU Presidents' Forum International Secretariat works as a networking platform to connect the scholars who share similar research interests. The aim of JRS is to help integrate resources to increase the quality, quantity and global scope of the research being conducted at our member universities, with the goal of advancing the research achievements of the SATU community.

Eligibility

Investigators must be working at one of the [SATU member universities](#) throughout the entire JRS process and have a doctoral degree.

Topics

Acceptable topics include those involving Liberal Arts, Management, Sciences, Social Science, Engineering, Electrical Engineering & Computer Science, Planning & Design, Bioscience & Biotechnology, and Medicine in Southeast and South Asia, and multidisciplinary research. Each project consists of a team of researchers, including a Principal Investigator (PI) and Co-Principal Investigator(s) (Co-PI(s)) from SATU member universities.

Timeline

Matching Procedures

The PI projects and the Co-PI applications will be matched as follows:

1. Call for PI proposals

In this stage, all academic members of SATU member universities are invited to submit their research project proposals via the PI proposal submission forms. At the end of this stage, the project information will be compiled into a PI project list.

2. Call for Co-PI applications

All academic members of SATU member universities can refer to the PI project list for projects which they would like to join as Co-PIs, and submit the Co-PI application form, in which they will be asked to indicate the code of the projects of interest, and provide a CV.

3. Matching - Co-PI application sent to PI for review and selection

When the Co-PI application period is over, each PI will receive a list of Co-PI applicants interested in joining his/her project. The PI will then be asked to review the Co-PIs' applications, and inform us of the Co-PI(s) s/he would like to work with.

4. Matching announcement

Upon receipt of the PIs' decisions, we will notify both the PIs and Co-PIs if the matching is successful. If the matching is successful, the PI and Co-PIs concerned will be provided with the contact information of all investigators in

their respective teams. This is the point where the PIs and Co-PIs can start their collaboration e.g. start a discussion on research planning and implementation etc.

A list of matched projects will also be released on this website.

Application

Interested scholars can join the JRS as Principal Investigator (PI) and/or Co-Principal Investigator.

As Principal Investigators (PI)

To join the JRS as a Principal Investigator (PI), please submit your research proposal via the "PI Proposal" Form below.

Information needed when submitting the research proposal

1. PI's personal and contact information
2. Project field
3. The project's related UN Sustainable Development Goals (SDGs).
Further information about UN SDGs: <https://sdgs.un.org/goals>
4. Project title
5. Project description (Plain text)

As Co-Principal Investigators (Co-PI)

The application as Co-Principal Investigator (Co-PI) will be open after the PI proposal submission period is closed.

Things to do before filling in Co-PI's application

1. Refer to the PI project list (to be available in due course at this webpage) for the code(s) of the preferred project(s). You will need to choose the code when filling in the application.
2. Prepare a CV listed with your publications:
 - a) All papers or works published in the past five years, including articles published in periodicals, books, conference papers, and technical reports.
 - b) List these papers and works in order of the publication date (latest publication on top).

*The application along with the CV will be sent to PI for review.

Member University's Funding Schemes

Last updated: XXX

The JRS platform does not provide funding for the matched projects. However, a number of SATU member universities provides financial support for their hosted projects. Here listed some of the funding schemes for JRS participants administered by the SATU member universities. As the list is not exhaustive, please feel free to check with your institution's international office or the [SATU local contact](#) for the availability of any funding opportunities.

Mahidol University

National Cheng Kung University

Prince of Songkla University

SRM Institute of Science and Technology

Suranaree University of Technology
