PROGRAM S1
DESAIN INTERIOR
Undergraduate Program of Interior Design

PROGRAM S1 DESAIN INTERIOR

Undergraduate Program of Interior Design

Desain interior adalah sebuah disiplin ilmu yang berfokus pada membenahi ruang, mengubahnya menjadi lingkungan yang menarik secara visual, fungsional, dan harmonis. Desain interior juga memperhatikan susunan spasial, skema warna, pencahayaan, pemilihan material, dan penempatan furnitur serta dekorasi dengan cermat.

Struktur kurikulum di Program S1 Desain Interior dirancang untuk mempersiapkan mahasiswa sehingga siap menjadi profesional di bidang desain interior. Mahasiswa diwajibkan untuk menyelesaikan 144sk yang secara normatif ditempuh dalam 4 tahun. Sistem pembelajaran dapat berupa seminar, kelas studio perancangan, kunjungan studi, dsb.

Berikut beberapa contoh prospek kerja lulusan desain interior:

- Desainer Interior
- Desainer Furnitur
- Kontraktor Interior
- Visual Merchandiser
- Art and Culture researcher
- Penata Museum/ Preparator

Interior design is a discipline that focuses on improving spaces, transforming them into visually appealing, functional, and harmonious environments. Interior design also takes into careful consideration spatial arrangement, colour schemes, lighting, material selection, and the placement of furniture and decorations.

The curriculum structure is designed to equip students with the knowledge and skills necessary for successful career in the field of interior design. Students are required to complete 144 credits which is normatively achieved within 4 years. The learning and teaching method may include seminars, studio design classes, study visits, etc.

Here are some examples of potential career prospects for interior design graduates:

- Interior designer
- Furniture designer
- Interior Contractor
- Visual Merchandiser
- Art and Culture researcher
- Museum Preparator

FASILITAS FACILITIES

HALL MULTIPURPOSE

FACILITIES
Laboratorium:
Laboratorium Perilaku dan Lingkungan Interior; Laboratorium Estetika Interior; Laboratorium Sains dan Teknologi Sains

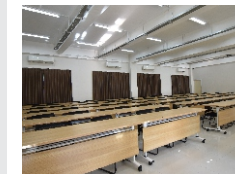

Ruang Kelas:
Ruang Kelas Studio, Ruang Kelas Teori, Smart Classroom, Ruang Komputer, Ruang Seminar

Workshop:
Workshop hadir mendukung mahasiswa dalam membuat prototipe. Workshop dilengkapi dengan mesin CO2 Laser Cutter, CNC Router, Sliding/Cutting Table with Industrial Standard, Oven Keramik.

FACILITIES
Laboratory:
Laboratory of Behavior and Environment; Laboratory of Aesthetics and Culture; Laboratory of Interior Science

Classroom:
Studio Classes, Classroom for theory courses, Smart Classroom, Computer Room, Seminar Hall

Workshop:
The workshop accommodates students in creating prototypes. The workshop is equipped with various machines and equipment such as a CO2 laser cutter, CNC router, sliding/cutting table with industrial standards, ceramic kiln, etc.
