Maurice Ntahobari

Rwanda – KNB Scholarship Awardee
Master of Informatics Engineering

During my stay in ITS, life was really very nice and interesting. ITS is a lovely educational institution where I met with many students from different countries. Due to this, I learnt various culture and experienced different good behaviour. I also got the technical skills and knowledge as joined informatics department. Again, I enjoyed the way the lecturers interact with the students which is certainly helpful and makes easier for international students to better study and do researches. Finally, the international office care much about the students to smoothly realize their studies. Thank you very much you all ITS staffs.

INTERNATIONAL STUDENTS' EXPERIENCE

Muy Thoeurn

Cambodia – AUN/SEED-Net Awardee
Master of Electrical Engineering

I could not believe I finished my 2 years in ITS very fast. I did really enjoy my life there with amazing friends, lecturers and especially my best supervisors. Of course, my life was really really tough for the first several weeks in Surabaya, since I had not know anyone even a Cambodian. However day by day, I felt release since IO staffs, they took care of International students well. Then I started getting to know a lot of good people there. Moreover my scholarship provider, AUN/Seed-net very much took care of me. They always followed up my study progress in every semester and providing living support every month. Without all them, I could not have finished my study in ITS successfully. I cannot thank you enough to all of them. I love AUN/ Seed-Net Program and I love ITS, Surabaya, Indonesia.
