# Internship at ITS

ITS provides opportunities for students from all over the world to have an internship experience at ITS laboratories (lab-based) or partner industries (industrial-based) or partner community (society-based). Students are given privilege to propose the duration of internship (1-6 months, the period will be approved by the Departement & informed in the LoA). By joining this program, you could, not only enjoying learning environment at ITS, but also enjoy wonderful experiences offered by Surabaya and Indonesia, ranging from diverse and unique culture, delicious culinary, beautiful nature, and friendly people.

## Laboratory-Based

With more than 170 laboratories at ITS, Laboratory-Based Internship (LBI) is a good place for potential students who would like to enhance and discover their scientific interest.

Students are required to contact their prospective supervisor at the host laboratory prior applying this program. List of laboratory and the head of laboratory could be accessed on the link below*.

## Society-Based

With the growing number of partners in various forms of community in Surabaya, international students at ITS are able to enroll in the society-based internship program with partners of ITS as a medium to enhance their social knowledge and awareness.

Designed for all majors, all international students at ITS are also able to select and customize their society-based internship programs based on their passion.

## Industrial-Based

Students should nominate several partner companies as the target of internship and proactively contact the company themselves.

Students will be teamed up with ITS students. Please be advised that due to Indonesian immigration laws, internship students from overseas are not eligible to get paid during the internship period.

## 📅 Application Deadline

Max. 3 months before the internship

# International Students' Experience

**Luc Johan Gerardus Kauhl**
HZ University of Applied Sciences, Netherlands
Ocean Engineering Department

The research internship I have done at ITS is one of the best things I have done in my life. There are many opportunities to explore and improve yourself. With every step on the way, there was the great support of the International Office whom helped with visa extentions and have a great buddy system with awesome people to help with anything else. If I had the chance I would definitely go again and I would advice anyone with the oportunity to go here as well.

**Alicia Boullery**
École Internationale des Sciences du Traitement de l'Information (EISTI) - France
Information System Department

I did my first internship in the ITS lab. My internship was about programming. It was a little difficult to choose a subject at first, because of my lack of knowledge. However, they give a subject with a language I know about. But, it was hard because this part of this language was unknown by the internet. So I had a lot of meetings with my tutors and they really help me and they were here for any questions. To summarize, it was a great experience and I am happy I did it.

**Yugo Kuramura**
Kumamoto University, Japan
Information System Department

The research internship is one of the best things that I will remember for my entire life. Before I went to Indonesia, I had 3 things that I must do, first, conduct research and broaden perspective through exchanging opinions, second, experience Indonesian culture, especially food, lastly, communicate with others using English. It was my first time to go abroad. at first, I felt nervous, but thanks to the IO staff and the budies for the kindness, I think I was able to achieve my goals while I was also having fun. If I Have a chance, I'd definitely go again
