International Students Experience

Jean-Baptiste Verstraete

INSA Rennes, France

Master - Metalurgy and Material Department

I had the chance to be an exchange student at ITS Surabaya for my last semester of my master and it was a really great way to end my studies. Even though Indonesia is extremely different from my home country, the international office staff and volunteers took good care of me, making sure I would survive. The people at my department were also extremely nice and I felt welcome from the very first day there. The lecturers paid extremely good attention to help me and I feel that studying with different methods will be truly beneficial to my future in R&D.

Irda Suriana Haji Bujang

UBD, Brunei Darussalam

Bachelor — Mathematics Department

One of the most remarkable journey in my life is being able to join the Student Exchange Program in ITS. I am grateful that I was selected to be part of it. Through this program, I gained a completely different experience that was outside of my comfort zone, knowing it would allow me to develop as a person, student, and professional. ITS has given me a warm welcome since the first time I step in to the campus. Everyone on the campus was so nice, including the lecturers. It was hard being the only exchange student in the Maths Department. However, with the help of lecturers, International Office staffs and colleagues, I managed to get through a semester there, with hassle.

Jia Yang

Dankook University, South Korea

Bachelor - Bussiness Management Department

My experience in ITS was meaningful moments for me. The students are energetic and enthusiastic about their major. The classes are made up of presentations and debates of students and the students' participation was high. That was very impressive for me. And then international office provided a lot of programs to get used to Indonesian culture. So if you are interested in studying as an international student at ITS, you will find the charms of ITS through the programs.
