

CREDIT POINTS AND EXAMINATIONS

Our university offers 5 ECTS credit points for attending the SUL. The 5 ECTS are awarded for attendance of the lectures and the company visits as well as for the final exam.

HOUSING

You can choose between two housing options:

Option 1: Shared student apartment

You will be accommodated with other German or international students in student apartments near the campus. Students will have their own bedroom but will usually share a bathroom and a kitchen. The apartments are located throughout the city of Lingen and are not in one building complex. You are responsible for keeping your own room and the common areas (kitchen and bathroom) clean.

Option 2: Find your own housing

You can organize housing for yourself in one of the hotels in Lingen or vacation apartments. After your acceptance to the program, you will receive a list of possible hotels. You are responsible for making your own reservations.

THE CITY OF LINGEN

Looking back on more than 1,000 years of history, Lingen has many stories to tell. Nowadays, 52,000 inhabitants live in Lingen's safe and family-friendly neighborhoods and work in nearby businesses. Lingen has a rich cultural life, and both our students and staff are very active not only in participating, but also in shaping many activities. Studying in Lingen means becoming part of the community, both on and off campus.

What makes the city of Lingen special?

- safe city with very welcoming and open-minded people
- city center in walking distance from campus
- a variety of restaurants, cafés and bars
- cultural offers such as theaters, cinemas and a concert hall
- great nature activities, such as bike-riding and swimming
- good public transportation to explore neighboring cities such as Münster, Osnabrück, Bremen or Amsterdam (Netherlands)

SUMMER UNIVERSITY LINGEN

Global Players and Hidden Champions: Business and Technology Made in Germany

July 5 - July 18, 2020

MKT

FACULTY OF MANAGEMENT,
CULTURE AND TECHNOLOGY

PROGRAM CONTENT

Global Players and Hidden Champions: Business and Technology Made in Germany

The backbone of Germany's economy are family-owned medium-sized companies, the so-called German Mittelstand, which not only have high revenues but are also often huge players on the global market. The area of Lingen, where our Summer University takes place, is home to many Mittelstand companies. The companies have strong ties to the region while at the same time operating very successfully on an international and global market. The Summer University Lingen (SUL) will analyze the following questions:

- What is the structure of German economy and what are the challenges?
- What is the German Mittelstand?
- What are the key success factors of family-owned and medium-sized companies? How did they become internationally successful?

Students will attend lectures on topics such as

- Features of small and medium-sized enterprises (SME)
- International Management and International Marketing
- International Human Resource Management
- Technology based SME

Besides the lectures, students will also participate in group and project work as well as deal with case studies.

Summer University Lingen puts theory into practice!

We will visit several internationally operating companies to gain insight into the regional, international and global procedures of companies in Germany, the city of Lingen and its surrounding area. The companies come from different industries such as automotive engineering, air-conditioning technology, shipbuilding and other innovative technology branches. A couple of weeks before the start of the SUL, we will announce the companies we

will visit, so that you can obtain information on these companies in advance. The company visits are a great opportunity to get a unique insight, talk to company representatives, get first-hand information, build a network with potential future employers and to find out what German employers are looking for.

Please find more information on the SUL 2020 here:
