**International Schools Department of Samara National Research University** makes two-week schools for students since 2015.

Samara University (is in top-10 universities in Russia) organizes the schools both online and offline. ECTS certificate is provided.

- **1000+ participants**
- **52+ countries**
- **Study and cultural parts**

**Samara city** is located in the southeastern part of European Russia on the eastern bank of the Volga River. Samara is the space capital of Russia. Now it is an important political, industrial and cultural center of Russia. The city is a busy communication hub and an important center of the aerospace, automotive, chemical and energy industries.

**Cultural & social program** is a daily part of International schools. Cultural part includes tours around Samara city to:

- **old town of Samara;**
- **Samara city's embankment;**
- **historical Leningradskaya street;**
- **campus of Samara University;**
- **traditional Russian cafés and stores;**
- **acquaintance with Russian way of life.**

Social part of the program includes online playing games with the team of international school and online playing quiz about Russian culture.

**Samara University** is one of the most dynamically developing Russian universities. The University is formed by the union of Samara State Aerospace and Samara State Universities. In recent years, the university has been steadily improving its performance in Russian and international rankings. For many years, Samara University has been inextricably linked with the overall industrial and economic development of the region, which is one of the leading domestic and world centers of aerospace technologies. Currently, teaching and research at Samara University are organized by 7 institutes. There are many unique scientific laboratories here.

# Russian Language and Culture

You will speak Russian after this school! Successful Russian language study is the study with native speakers! Meet native speakers, find out more about Russian culture and Russian people's set of mind. The school is held in English and Russian. The program is constructed so that everyone can easily improve his/her Russian!

We also have an online format of school Russian Language and Culture! The school provides a total feeling of presence in Russia. Unlike other platforms, we present the program that will give much beyond the studies.

We will take you to play Russian famous games, walk with you along vivid streets and show the most beautiful places of the city, visit Space museum, other exclusive sites of Samara.

Along with language classes, the school offers courses on history and culture of Russia, master classes on making Russian food and souvenirs.

Certificate on 4 ECTS (offline)/ 3 ECTS (online) is provided.

# High Technology Management

High Technology Management School is offered by Samara University as an intensive study and research course. During this school students with different backgrounds will receive knowledge and skills of hi-tech enterprises' management. Students will visit successful innovative companies in order to understand the foundations of high technology management and its practical and monetary issues.

The course is open for all ambitious students interested in human sciences, engineering or maths. By the end of this course students will have an opportunity to create their innovative hi-tech project. Our friendly team, lectures, entrepreneurs, mentors and coaches will lead the participants throughout the process, thus they can take a maximum of it. Acquired knowledge will help students in further commercialization of their ideas.

Certificate on 4 ECTS (offline)/ 3 ECTS (online) is provided.

# Functional Analysis

Find out what it means to be an analyst, including

- what technical knowledge is necessary,
- how to perform business and system analysis within different projects and products.

We will explain technical fundamentals (so it is ok if you are new to IT and do not have a background in systems development), show examples of using the system and business analysis instruments and techniques within a project and product management frameworks.

Even though you will cover some introductory material, you will also see and discuss real cases of applications development from Russian and international companies. We are sure that it will be interesting for experienced analysts: during the program, you can enhance your hard skills and then try to apply them during the case study.

This program is jointly introduced by Samara University and Accenture company.

Certificate on 3 ECTS is provided.

# International Law

There is no need to explain the importance of international relationship nowadays. Consequently, international law is important part of its development. Our International Law school is focused on recent developments in the field of International Law, and guides students through the central debates within the sphere. In real-time mode you will take part in court sessions.

And this won't be a regular course. Cultural part is as important as the studies! We will take you to excursions such as Space museum, Stalin's bunker, walk with you along historical streets and show the most beautiful places in the city. International Law School is aimed at gap year students, current undergraduates and any other adult learners who wish to expand their understanding of International Law with like-minded peers from all over the world. Our friendly team, lecturers, entrepreneurs, mentors and coaches will lead the participants throughout the process, thus they can take a maximum of it.

Certificate on 4 ECTS (offline)/ 3 ECTS (online) is provided.

UNIVERSITY

# Robotics and Mechatronics

Create your own robot and compete with your friends in robots' competition. One of the leading regional robotic clubs and the best keen lecturers have gathered to give a broad overview of intelligent systems through a project-based approach. The course is for bachelor and master students who want to get knowledge and experience in all robots designing steps: in appropriate sensor selection, machine perception, path planning, localization, and artificial intelligence methodologies. All needed components and materials to assemble your robot and compete with other teams are at your disposal and included in the fee. You can use 3D printer to print any extra parts. Our friendly team, lecturers, entrepreneurs, mentors and coaches will lead the participants throughout the process, thus they can take a maximum of it.

Certificate on 4 ECTS is provided.

# Space Materials and Technologies

The development of space research is a priority around the world. Humanity has always dreamed of near and long-distance flights into space and to other planets of the solar system.

Technology created for space concentrates everything the most advanced, from design decisions to the choice of new materials and technologies. While designers can find technical solutions with the help of computer modeling, the implementation of these solutions requires the development of new materials and innovative technologies.

With advanced experience, Samara University (is in top-10 universities in Russia) organizes this two-week school. The most outstanding scientists will lead you to the insights of laboratories and show you machines and satellites that were created here in Samara National Research University and now are applied all over the world.

Certificate on 4 ECTS (offline)/ 3 ECTS (online) is provided.

UNIVERSITY

# 3D Printing Technologies

The school program is suitable for students and engineers interested in additive manufacturing for real industrial applications. You will learn 3D modeling and design your own product. You will study how to select 3D printing process and material for a best profit performance. You will be introduced to the principles of designing parts for AM for each major process, illustrated through a series of instructional examples and see artifacts produced at Samara University.

The study program consists of two parts.  
1 part: basic principles of the technologies and an overview of its applications.  
2 part: case study activities at research laboratories.

Along with studies, you will get a rich cultural program. Our team has prepared a wonderful journey to Russian cultural and social life.

Certificate on 4 ECTS is provided.

# Digital Design based on FPGA

The course is focused on FPGA-based digital design topics.

After the course, students are expected to be able to use VHDL and Xilinx Vivado software for digital design. The course provides basic competencies in VHDL-based digital design with practical experience in simulation and hardware debugging. The course could be a good starting point for the students, going to work in IC design and computer engineering.

The course implies that students are familiar with basics of electronics and informatics. At least some knowledge of MOS transistors and binary mathematics is expected.

Our friendly team, lectures, mentors and coaches will lead the participants throughout the process, thus they can take a maximum of it.

Certificate on 4 ECTS is provided.

# Sustainable Business Strategies

within ecological, social & economic systems

The Sustainable Business Strategies school provides you with a set of sustainability concepts and its indicators for effective project management, consulting services and innovative engineering solutions. To align with the Sustainable Development agenda, “business as usual” needs to integrate an ecosystem approach where natural and human worlds are closely interconnected.

The new generation of leaders needs to be cross-disciplinary and broad-knowledge. You will be taught by tenured professionals in the topics from the top-notch academic universities and companies with strong practical backgrounds. After the course, you will acquire basic skills for sustainable management, entrepreneurship and innovation.

Certificate on 3 ECTS is provided.

# Soft Skills

Modern craziness is dictating new rules and we should follow the novelty and be flexible. Soft skills are vital bunch of knowledge for here and now regardless of your background. The global lockdown showed us the necessity of harmonious coexistence of flexibility and tranquility and this course will contain the brilliant combination of tools balanced your confidence and competence. The discipline is filled out with not only pure theoretical knowledge about personal and interpersonal skills and communication, but also with interactive, not stressing but useful tasks, games and other activities.

The teaching staff of this course is selected exclusively from practicing people with real cases and working instruments. The main goal of this school is to rocket your personal effectiveness, confidence and leadership giving an essential set of knowledges about communication skills, negotiations, social and emotional intelligence, creative and critical thinking, self-presentation and public speaking.

At the end of this course you will have a real result in the form of brilliant CV for your future job or catchy start-up pitch. Welcome to the most joyful study ever!

Certificate on 2 ECTS is provided.

# Fashion Studies

The School of Fashion Study (SFS) is a digital stylist school for those who want to learn how to match clothes in a certain style and taking into account fashion trends, always looking good and helping clients. On the Digital Stylist course, you will learn about fashion trends, make creative works: collages and videos of original design and author's style. After this course, you will be able to work with clients at a higher professional level, help select clothes and accessories, create fashionable looks and become a more successful online stylist. The intensive format of the SFS school will help you improve your skills in a short time. You will be exploring photo processing applications. From clothing options, you will create fashionable bows. You will also explore color predictions for seasons 2022-23

We have partnered with the renowned online Beijing international Stylist King contest and your creative work can make you a celebrity on social media!

Certificate on 2 ECTS is provided.
