Tanzania

To gain life experiences, including new skills, New friends, and talking to them in new languages. For Example now i can communicate with three languages (Swahili, English and bahasa). On the other hand, i wanted to study abroad so as to experience new culture including food, language, wearing, dancing, singing, religions, and all about traditions and customs of the respective country. In addition to that I was able to **gain new professional knowledge for increasing working skills**. Last but not least i was inspired to study abroad for visiting various historical, touristic and enjoyable places, taking example here in indonesia so many wonderful places like Bromo, Bali, Malang, Surabaya, and many others with such criteria, in fact **i am so happy and thankful for all of that**

I was so excited especially after seeing that some people from ITS were already at airport for welcoming us, with such **honor and warm welcome made us feel comfortable just like at home**. Despite that Surabaya is somehow hot
