What inspired me to study overseas is the way I am able to **explore new cultures**, interact with new people, especially challenging myself in new environmental study.

My first impression of ITS is that I saw plenty of trees. **It is a green and lovely campus.**

As an international student living in a non-spoken English country, **my big challenge here is Language.**

There are classes for practicing the local language, so I can interact with some people for basic communication.

My favorite experiences during study in ITS is that we have **good support and care from International Office hospitality.** Also we have an international student family, we have established many sport activities on the weekend.

ITS is one of the well-recognized campuses in Indonesia in terms of reputation and study materials.

I would say until you try, then you would figure out the way it is.

During my stay with ITS, I was **provided with several trips to very beautiful tourist destinations**. I have gotten the great chance to participate to cultural events where i earned new experiences, meet new people and have a chance to say 'hello' to them, and never forget **to express my gratitude for providing good care to me.**
