There are a few cases that inspire me to study abroad:

**Educational opportunities:** Studying abroad offers access to unique educational programs and courses that provide the field for my interests.

**Personal development and independence:** Studying abroad may be a life-changing experience that fosters development of the self, independence, and others.

**Travel:** The chance to travel and discover new places is offered by studying abroad. Progress in one's career: Abroad experience can likewise be appealing to bosses and can improve work prospects and vocation.

When I arrived at ITS: My first impression was of the campus environment, which was so fresh because of the many trees. **The student is so friendly, which makes me feel warm.** In addition, as one of Indonesia's oldest technology colleges, ITS has a long history and a solid reputation for turning out highly qualified graduates.

Surabaya: My initial feeling was the **dynamic culture, scrumptious food, and clamoring city life.** With a significant seaport and airport that connect it to other parts of the country and the world, Surabaya is also an important commercial hub in Indonesia.

It may be difficult for students to keep up with the rigorous academic requirements of ITS. I can, however, overcome this obstacle by developing **good study habits** like taking thorough notes, reviewing class materials frequently, seeking assistance from peers or professors, and making use of academic resources like the library.

Understudies from non-Indonesian talking foundations might confront difficulties in correspondence and figuring out the course material. However, I can either improve their comprehension of the course material by **learning basic Indonesian language skills** or by utilizing translation tools.

**My favorite experience at ITS is attending cultural events**, festivals, and trips with international students.

**Participating in exploring the local** cuisine and attractions, making new friends from different backgrounds, and working on research projects with faculty and peers are some of the most common activities I have enjoyed at ITS. I've also said that **I like the warm and friendly environment at ITS** and the chances to learn new skills and pursue my academic and personal interests.

**Try to learn the Indonesian language:**

International students can interact more successfully with faculty members and local students by learning the fundamentals of Indonesian. Additionally, it might help them better integrate into and comprehend Indonesian culture.

**Keep an open mind:**

While studying abroad can be an exciting and novel experience, it can also be fraught with difficulties. You can get the most out of your time at ITS if you are flexible, tolerant, and open to new experiences and cultures.

While being an international student can be a fulfilling and exciting experience, it can also come with its own set of difficulties. Cultural differences, language barriers, homesickness, academic stress, and cultural differences are all potential obstacles. However, **you can overcome these obstacles and thrive in new environment with proper planning, support, and a positive attitude.**

One of the greatest benefits of being a global understudy is the potential chance to **acquire another point of view and comprehension of the world.** You can gain valuable insights and experiences that can assist you in your personal and professional lives by immersing yourself in a new culture and environment.
