Asia University offers a program dedicated to cutting-edge Artificial Intelligence (AI) technologies, aimed at cultivating the next generation of data scientists and enhancing career skills. The program also provides valuable networking opportunities with international students.

## ABOUT THE PROGRAM

The course teaches programming skills, deep learning methods, and AI application using TensorFlow. It includes AI software and real-world applications, culminating in a data product to showcase your skills to employers. Emphasizing collaboration and communication, the program prepares you for diverse teams and features guest lectures from industry experts on AI trends. This immersive experience enhances both your technical abilities and critical thinking.

## THE PROGRAM FEATURES

During a three-week campus study, you'll attend six hours of classes daily and engage in problem-based AI projects with support from TAs from Asia University. The hands-on curriculum emphasizes practical experience through workshops and group work, fostering innovation and critical thinking. You'll also explore Taiwan's cultural heritage through organized excursions, enhancing your overall learning experience.

By the program's end, you'll gain a thorough understanding of artificial intelligence and the skills to address real-world challenges, leaving with both a certificate and confidence in your expertise.

This summer, Asia University invites international students to join its Web Design and Digital Storytelling program. The program supports students academically and socially, offering a transformative learning experience through a dynamic blend of educational and social activities.

## ABOUT THE PROGRAM

Asia University offers a transformative three-week program in the College of Information and Electrical Engineering for international students. Participants develop skills in digital storytelling and web development, mastering HTML5, CSS3, Bootstrap, and JavaScript through hands-on workshops and projects. Experienced faculty provide personalized guidance to help students create functional and visually engaging websites. The program also emphasizes cultural exchange and personal growth, enabling students to interact with peers from diverse backgrounds and explore local culture.

This program emphasizes storytelling in the digital age, with web design as the focus of the capstone project. Students are guided through website creation, learning to communicate compelling and accessible narratives. They are also introduced to AI-assisted tools that support idea development, design, and storytelling while encouraging responsible and creative use of technology. The project culminates in a website that showcases students' web development skills and understanding of accessible design, blending technical expertise with digital storytelling.

## THE PROGRAM FEATURES

Mastering the range of technologies introduced in this summer program will enable you to develop high-quality websites that function smoothly across different platforms, including mobile, tablet, and large-screen browsers, while also exploring digital and AI-assisted tools to enhance design ideas and content creation. The capstone project will demonstrate your ability to plan, design, and implement a responsive and accessible website, using appropriate tools to create a site that reaches and engages a wide range of audiences.

Welcome to Asia University's 2026 Summer Program, tailored for local and international students. This program focuses on corporate decisions at smart finance in financial markets with competition investments and game theory. Participants will gain competitive advantages and managerial tools for smart financing and investor protection in corporate governance.

## ABOUT THE PROGRAM

Students globally can join a 3-week program featuring lessons, company visits, and cultural experiences. Accepted participants will explore diverse topics in stochastic environments, integrating appraisal concepts and addressing various risks within legal society.

## THE PROGRAM FEATURES

The world is changing more rapidly than ever before. The frameworks not only reconcile the extant strategic logics with foreseeable thinking but also fill the voids there in by providing a comprehensive treatment of the value creation. Starting with these incentives for earning an entrepreneurial surplus or enhancing value opportunities, the lectures in module components consist of introduction to investment decisions, asset pricing, business valuation, real option, game theory, reinforcement learning, AI model analysis and investor behavioral biases in stochastic environments and then attain goals of success in applying to innovative technologies and creating business opportunities.

Every summer, Asia University transforms into an international hub for students through its Creative and Cultural Aesthetics program. This program combines academic content with cultural experiences, promoting creative growth and global connections while equipping participants with skills for success in an innovative learning environment in Taiwan.

## ABOUT THE PROGRAM

The Creative and Cultural Aesthetics 2026 Summer Program at Asia University in Taiwan offers a 9-day immersive experience in design thinking, cultural identity, and innovation. Led by esteemed faculty, students will explore Taiwan's culture through traditional crafts like metal art and wire crafting, as well as modern practices such as user-centered design and visual storytelling, examining the global impact of culture on design.

## PROGRAM HIGHLIGHTS

- **Craft-focused workshops on metal wire techniques and metal etching art**, introducing students to traditional materials and making processes.
- **Design studio projects in furniture design, visual communication, and animation character creation**, encouraging hands-on creativity.
- **Lectures and sessions on User-Centered Design, Designs with Local Touches, and Local Culture and Aesthetic Economy**, deepening cultural awareness through design.
- **Cultural field visits to the National Art Museum and the National Theater**, offering insights into Taiwan's creative and cultural industries.

This intensive summer program combines lectures, workshops, field visits, and project-based learning to examine design, culture, and innovation. Students gain hands-on experience in craft, product, communication, and animation design, focusing on cultural identity, sustainability, and creativity. Led by expert faculty, the program promotes collaborative learning and intercultural exchange. The final capstone project involves creating a meaningful design concept rooted in cultural awareness, enhancing students' academic and creative portfolios.
