

# UIM-AUN SUMMER CAMP 2026

***BLUE HORIZONS:  
ADVANCING SUSTAINABLE OCEANS***

***1 - 12 September 2026***

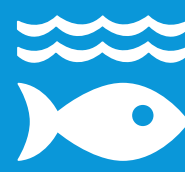

**9** INDUSTRY, INNOVATION  
AND INFRASTRUCTURE

**13** CLIMATE  
ACTION

**14** LIFE BELOW  
WATER

**15** LIFE  
ON LAND

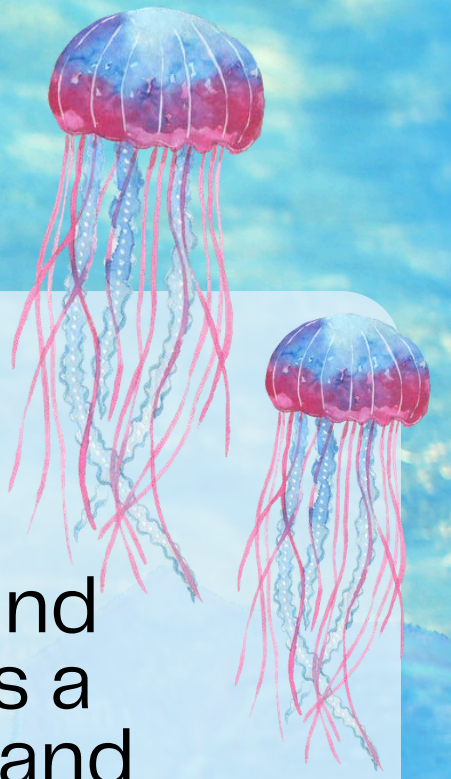

## ***PROGRAMME OVERVIEW***

Get the opportunity to explore and know Malaysia through the people, culture and exotic marine life by participating in this amazing program! This program covers a wide range of marine related topics that introduce aspects of Malaysia's coastal and ocean sustainability. Participants will gain exposure to intellectual exchange and foster networking among international friends. They will have the opportunity to experience close encounters with exotic marine life while learning to understand the importance of marine diversity conservation.

## ***OBJECTIVE***

UM-AUN Summer Camp provides a unique opportunity for international and local students to enrich their experience in marine science education and cultural exploration. This is an opportunity to gain once in a lifetime experience, enhance knowledge about marine science, widen your network among friends from different countries, and explore the multiculturalism of Malaysia.

# LEARNING OUTCOMES

Participants will develop a deep understanding of marine sustainability issues, challenges and solutions, that will empower them in environmental conservation and sustainable development engagements.

Participants will obtain hands-on experience and skills related to marine sustainability practices through field visits and surveys, laboratory practicals, and interactive activities on marine biodiversity, conservation and sustainable development.

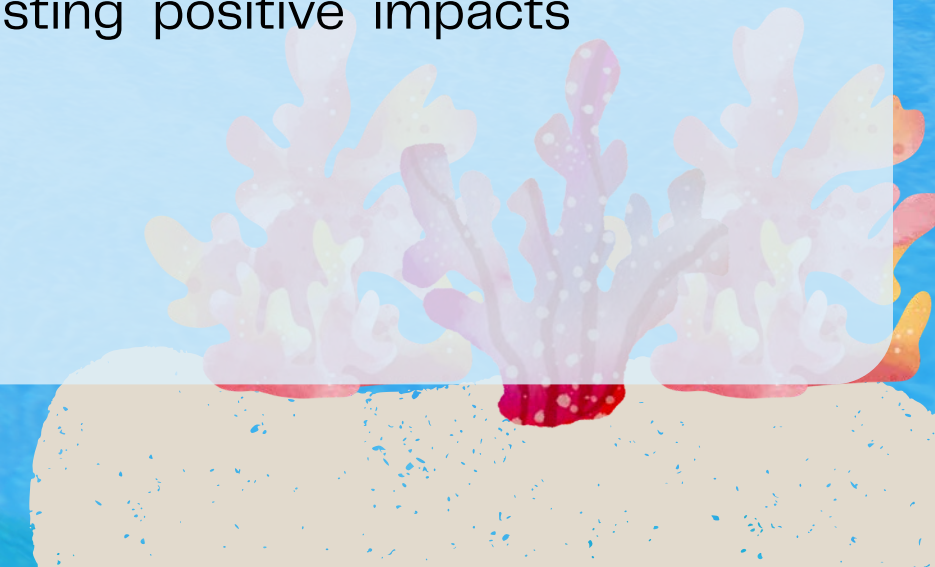

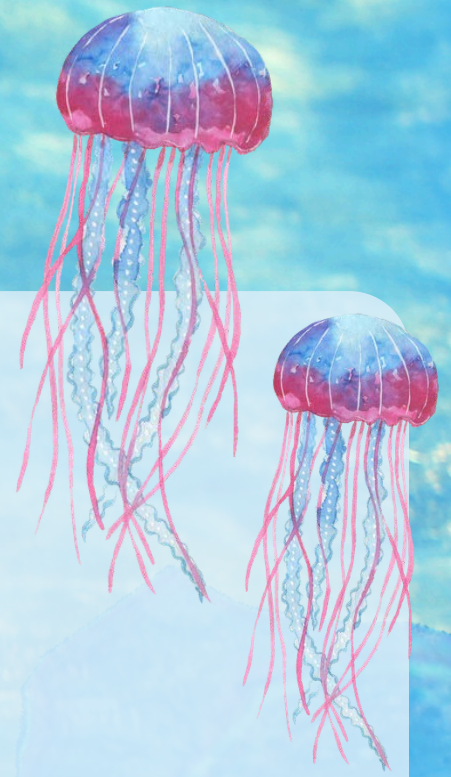

Participants will immerse in cross-cultural exchange and collaborative activities that bring together students from diverse backgrounds, while exploring how different communities approach towards sustainability.

Participants will gain problem-solving, critical and innovative thinking, through creative teamwork activities to develop practical solutions for marine environmental and social issues.

Participants will be effective scientific communicators who are able to convey issues of marine sustainability through oral presentation and other media to various communities and audience, while creating lasting positive impacts to society.
