RENCANA PEMBELAJARAN SEMESTER / SEMESTER LEARNING PLAN

MATA KULIAH (MK) COURSE	KODE CODE	Rumpun MK Course Cluster	BOBOT (sks) Credits		SEMESTER Semester	Tgl Penyusunan Compilation Date
Sistem dan Kontrol <i>Systems and Control</i>	KM186216	Matematika Terapan <i>Applied Mathematics</i>	3		2	
OTORISASI / PENGESAHAN AUTHORIZATION / ENDORSEMENT	Dosen Pengembang RPS Developer Lecturer of Semester Learning Plan		Koordinator RMK Course Cluster Coordinator		Ka DEPARTEMEN Head of Department	
			(Jika ada) Tanda tangan		Tanda tangan	
Capaian Pembelajaran	CPL-PRODI yang dibebankan pada MK ILO Program Charged to The Course					
	3.1.2	Mampu menguasai dan mengembangkan konsep-konsep matematika bidang pemodelan dan optimasi sistem <i>Able to master and develop mathematical concepts in the field of system modeling and optimization</i>				
	3.2.2	Mampu memformulasikan masalah nyata dalam model matematika <i>Able to formulate real problems in mathematical models</i>				
	4.1.2	Mampu menerapkan pokok-pokok matematika bidang pemodelan dan optimasi sistem untuk mendukung riset bidang lingkungan, pemukiman, kelautan, energi, atau teknologi informasi <i>Able to apply mathematical principles in the field of modeling and system optimization to support research in the fields of environment, settlement, marine, energy, or information technology</i>				

	4.2.1	<p>Mampu melakukan kajian tentang keakuratan suatu model matematis dari suatu permasalahan inter- atau multi-disiplin</p> <p><i>Able to conduct studies on the accuracy of a mathematical model of an inter- or multi-disciplinary problem</i></p>
<p>Capaian Pembelajaran Mata Kuliah (CPMK) / <i>Course Learning Outcome (CLO)</i></p> <p>Bila CP MK sbg penjabaran kemampuan setiap Tahap Pembelajaran dalam MK maka CPMK = Sub CPMK</p> <p><i>If CLO as description capability of each Learning Stage in the course, then CLO = Lesson Learning Outcome (LLO)</i></p>		
CPMK-1 CLO-1	<p>Mahasiswa mampu mengikuti perkembangan dan menerapkan sistem linear dan kontrol optimum serta mampu mengkomunikasikannya secara aktif dan benar baik lisan ataupun tulisan.</p> <p><i>Students are able to follow developments and apply a linear system and optimum control and are able to communicate actively and correctly both orally and in writing.</i></p>	
CPMK-2 CLO-2	<p>Mahasiswa mampu menjelaskan prinsip-prinsip dasar dan lanjut dari teori yang dipahaminya khususnya berkaitan dengan sistem linier dan mampu mendesain sistem kontrol yang sesuai.</p> <p><i>Students are able to explain the basic and advanced principles of the theory they understand, especially those related to linear systems and are able to design appropriate control systems.</i></p>	
CPMK-3 CLO-3	<p>Mahasiswa mampu menjelaskan secara cerdas dan kreatif tentang peranan signifikan sistem linier dan kontrol optimum dalam bidang rumpun pengetahuan terkait atau bidang lainnya.</p> <p><i>Students are able to explain intelligently and creatively about the significant role of linear systems and optimum control in the field of related knowledge clumps or other fields.</i></p>	
CPMK-4	<p>Mahasiswa mampu menyajikan pemahaman ilmunya dalam bidang sistem linier dan kontrol optimum secara mandiri ataupun dalam kerja tim.</p>	

	CLO-4	<i>Students are able to present their understanding of knowledge in the field of linear systems and optimum control independently or in teamwork.</i>					
Peta CPL – CP MK	<i>Tuliskan peta matriks antara CPL dengan CPMK (Sub CP MK)</i>

Diskripsi Singkat MK	<p>Pembahasan matakuliah Sistem dan Kontrol mencakup pengkajian Pengertian sistem, Prinsip-prinsip Pemodelan, Sistem Linear dan Sifat-sifat Sistem, Umpan Balik Keadaan dan Keluaran, Penyajian Masukan/Keluaran, Kontrol Optimal (LQR), dan Metode-metode Kontrol yang sedang berkembang. Pada proses pembelajaran di kelas peserta didik akan diberikan pemahaman identifikasi masalah dan penurunan model matematika serta mengekspresikannya kedalam bentuk sistem, selanjutnya menentukan kontrol yang sesuai dengan permasalahan tersebut. Selain diarahkan untuk belajar mandiri melalui tugas-tugas, peserta didik diarahkan untuk bekerjasama dalam kerja kelompok. Penilaian hasil belajar dilakukan melalui evaluasi tulis, tugas-tugas kegiatan dan diskusi di kelas.</p> <p><i>The discussion of the System and Control course includes an assessment of the definition of a system, Modeling Principles, Linear Systems and System Properties, Condition and Output Feedback, Presentation of Input / Output, Optimal Control (LQR), and developing control methods. In the learning process in the classroom, students will be given an understanding of problem identification and derivation of mathematical models and express it into a system form, then determine the appropriate controls for these problems. Besides being directed to learn independently through assignments, students are directed to work together in group work. Assessment of learning outcomes is done through written evaluation, activity assignments and class discussions.</i></p>						
Bahan Kajian: Materi pembelajaran	<ul style="list-style-type: none"> • Ruang Keadaan • Sistem MIMO • Desain Kontrol • <i>State Space</i> • <i>MIMO system</i> • <i>Control Design</i>
