AREAS OF EXPERTISE

Regional Planning

Urban Planning

Coastal Planning

Transportation and
Spatial Analysis

LABORATORY

Transport and Spatial Analysis Laboratory

The concentration of research and studies carried out by the Laboratory is more focused on spatial modeling, risk and disaster management systems, and the development of modeling systems, which among others assist in conducting analysis in the planning process.

Design and Urban Development Laboratory

The Urban Development & Design Laboratory is a forum for interaction between academics, both lecturers and students, who have interests and areas of expertise in urban development & urban design.

Regional, Coastal and Environmental Development Laboratory

Regional, Coastal and Environmental Development Laboratory is a forum in the field of study that integrates planning and development of coastal areas. In addition, the coastal area is also one of the spearheads of ITS's main focus as a maritime campus.

DEPARTMENT ACHIEVEMENTS

Currently, the Department of Urban and Regional Planning has a departmental journal that has entered the SINTA 3 category. Apart from excelling in scientific publications, several competitions have also been won, including the following below.

- Champion of Most Effort Advanced - ITS Tandur Race Category Experienced Gardener (2020)
- 2nd Place 5S+S Implementation for ITS Level Department Category 2019
- Winner of the Eco Campus Contest in Surabaya City in 2019

LECTURE PROGRAM

The specifications of the lecture program for the undergraduate (S1) Department of Urban and Regional Planning are as follows.

- Degree : Bachelor of Urban and Regional Planning (S.PWK)
- Study Period : 4 Years (8 semesters)
- Credit : 144 credits or 240 ECTS
www.its.ac.id/pwk/curriculum-structure/
- Accreditation : A (SK BAN-PT)
ASEAN University Network (AUN)
- Journal : Journal of Spatial Planning (SINTA 3)

RESEARCH

Computing and Planning Analysis

The concentration of research and studies carried out is more focused on spatial modeling, risk and disaster management systems, and the development of modeling systems, which among others assist in conducting analysis in the planning process.

Design and Urban Development

Concentration in the field of research and studies carried out is more towards urban design and urban building forms.

Coastal Zone and Environment Development

Concentrations in the fields of research and studies carried out include Regional Disparities, Rural Planning, Urban and Rural Relations, Competition and Collaboration between Regions, Disaster Management, Environmental Supporting Capacity, Sustainable Coastal Development, and Tourism Planning.

COLLABORATION

University Partners

In addition to international collaboration with universities, the Department of Urban and Regional Planning also has many collaborations with various government and private institutions, including the following below.

- Government service
- Ministry of PUPR, ATR/BPN, Maritime Affairs and Fisheries, etc
- The Global Alliance for Improved Nutrition (GAIN) Geneva, Switzerland
- JICA, Tokyo, Japan
- USAID, America
- APSA (Asia-Pacific Planning School Association), etc
