Module Name	Method of Planning Analysis
Module level, if applicable	Intermediate BoURP
Code, if applicable	CP234316
Subtitle, if applicable	-
Course, if applicable	Method of Planning Analysis
Semester(s) in which the module is	3 rd Semester
taught	
Person responsible for the module	Cahyono Susetyo, ST., MSc.
Lecturer	Cahyono Susetyo, ST., MSc.
Language	Indonesian, English
Relation to curriculum	Compulsory Courses for undergraduate program in
	Urban and Regional Planning
Type of teaching, contact hours	M3: Case study
	Lecture (Face to face lecture):
	2.5 hours x 14 weeks
	35 hours per semester
Workload	Regular (3 SKS)
	Class: 2.5 hours x 14 weeks = 35 hours
	Structured activities: 4 hours x 14 weeks = 56 hours
	Independent Study: 3 hours x 14 weeks = 42 hours
	Exam: 1.5 hours x 4 time = 6 hours
	Total = 133 hours
Credit points	3 SKS ~ 4.8 ECTS
Requirements according to the	Registered in this course
examination regulations	Minimum 80% attendance in this course
Recommended prerequisites	-
Module objectives/intended learning	General knowledge:
outcomes	1. Able to understand spatial and non-spatial
	planning methods in decision making in the
	field of urban and regional planning
	Able to understand the techniques and processes of urban and regional planning
	qualitatively, quantitatively, and spatial
	modeling (geographical information systems)
	and presentation techniques
	3. Able to apply planning formulation techniques
	and develop alternative spatial/spatial models
	through qualitative and quantitative
	approaches in the form of scenarios for setting
	spatial patterns and spatial structures of cities,
	regions, coasts
	4. Able to develop planning concepts and
	direction plans through the study of strategic
	issues in the context of cities, regions, coastal
	areas with an understanding of planning issues
	through observing and utilizing

CP234316 – Methods of Planning Analysis

Specific knowledge: 1. Data collection techniques (surveys) for qualitative and quantitative data 2. Data analysis with various regression technique 3. Linkage analysis between variables 4. Optimization in decision making 5. Data analysis with various qualitative and quantitative analysis techniques Content 1. Linkage analysis between variables 2. Data collection techniques (surveys) for qualitative and quantitative data 3. Data collection techniques (surveys) for qualitative and quantitative data 4. Data analysis with various regression technique 5. Data analysis between variables 2. Data collection techniques (surveys) for qualitative and quantitative data 3. Data collection techniques (surveys) for qualitative and quantitative data 4. Data analysis with various regression technique 5. Data analysis with various regression technique 6. Linkage analysis between variables
1. Data collection techniques (surveys) for qualitative and quantitative data2. Data analysis with various regression technique3. Linkage analysis between variables4. Optimization in decision making5. Data analysis with various qualitative and quantitative analysis techniquesContent1. Linkage analysis between variables2. Data collection techniques (surveys) for qualitative and quantitative data3. Data collection techniques (surveys) for qualitative and quantitative data4. Data analysis with various regression technique5. Data analysis with various regression technique6. Data analysis with various regression technique7. Data analysis with various regression technique
2. Data analysis with various regression technique3. Linkage analysis between variables4. Optimization in decision making5. Data analysis with various qualitative and quantitative analysis techniquesContent1. Linkage analysis between variables2. Data collection techniques (surveys) for qualitative and quantitative data3. Data collection techniques (surveys) for qualitative and quantitative data4. Data analysis with various regression technique5. Data analysis with various regression technique
3. Linkage analysis between variables 4. Optimization in decision making 5. Data analysis with various qualitative and quantitative analysis techniques Content 1. Linkage analysis between variables 2. Data collection techniques (surveys) for qualitative and quantitative data 3. Data collection techniques (surveys) for qualitative and quantitative data 4. Data collection techniques (surveys) for qualitative and quantitative data 5. Data analysis with various regression technique 5. Data analysis with various regression technique
 4. Optimization in decision making 5. Data analysis with various qualitative and quantitative analysis techniques Content 1. Linkage analysis between variables 2. Data collection techniques (surveys) for qualitative and quantitative data 3. Data collection techniques (surveys) for qualitative and quantitative data 4. Data analysis with various regression technique 5. Data analysis with various regression technique
5. Data analysis with various qualitative and quantitative analysis techniquesContent1. Linkage analysis between variables2. Data collection techniques (surveys) for qualitative and quantitative data3. Data collection techniques (surveys) for qualitative and quantitative data4. Data analysis with various regression techniques5. Data analysis with various regression techniques
quantitative analysis techniques Content 1. Linkage analysis between variables 2. Data collection techniques (surveys) for qualitative and quantitative data 3. Data collection techniques (surveys) for qualitative and quantitative data 4. Data analysis with various regression techniques 5. Data analysis with various regression techniques
Content1. Linkage analysis between variables2. Data collection techniques (surveys) for qualitative and quantitative data3. Data collection techniques (surveys) for qualitative and quantitative data4. Data analysis with various regression techniques5. Data analysis with various regression techniques
 qualitative and quantitative data 3. Data collection techniques (surveys) for qualitative and quantitative data 4. Data analysis with various regression technique 5. Data analysis with various regression technique
 Data collection techniques (surveys) for qualitative and quantitative data Data analysis with various regression technique Data analysis with various regression technique
qualitative and quantitative data4. Data analysis with various regression technique5. Data analysis with various regression technique
 Data analysis with various regression technique Data analysis with various regression technique
5. Data analysis with various regression technique
,
7. Linkage analysis between variables
8. Linkage analysis between variables
9. Optimization in Decision Making
10. Data analysis with various qualitative and
quantitative analysis techniques
11. Data analysis with various qualitative and
quantitative analysis techniques
12. Data analysis with various qualitative and quantitative analysis techniques
13. Data analysis with various qualitative and
quantitative analysis with various quantative and quantitative analysis techniques
14. Data collection techniques (surveys) for
qualitative and quantitative data
15. Data collection techniques (surveys) for
qualitative and quantitative data
Study and examination requirements 4 assessments: and forms of examination
Evaluation Method Weight
1 Quiz 1 (quantitative) 15%
2 Practicum 35%
3 Quiz 2 (qualitative) 15%
4 Small research task 35%
1. Quiz 1 – week 10
2. Practicum – week 4-15
3.Quiz 2 – week 164.Small research task – week 16
Media employed Classical teaching tools with white board and power
point presentation, audiovisual, zoom meeting, ITS
online classroom.
