MODULE HANDBOOK

COMPUTER PROGRAMMING

Module name	COMPUTER PROGRAMMING		
Module level	Undergraduate		
Code	SS234101		
Course (if applicable)	COMPUTER PROGRAMMING		
Semester	1		
Person responsible for the module	Adatul Mukarromah, S.Si. M.Si		
Lecturer	Adatul Mukarromah, S.Si. M.Si; Prof. Drs. Nur Iriawan, M.Ikom, Ph.D		
Language	Bahasa Indonesia and English		
Relation to curriculum	Undergraduate degree program, mandatory, 1th semester.		
Type of teaching, contact hours	Lectures, <50 students		
Workload	1. Lectures [L]: $4 \times 50 = 200$ minutes per week. 2. Exercises and Assignments [EA]: $4 \times 60 = 240$ minutes (4hours) per week. 3. Individual Learning [IL]: $4 \times 60 = 240$ minutes (4 hours) per week.		
Credit points	4 credit points (SKS), equivalent to 6,4 ECTS		
Requirements according to the examination regulations	A student must have attended at least 80% of the lectures to sit in the exams.		
Mandatory prerequisites	-		
Learning outcomes and their corresponding PLOs	CLO.1 Able to understand the use of data types, variables and assignments in computational techniques CLO.2 Able to use control structure (conditional statements and looping) in computer programming CLO.3 Able to identify and formulate array, record (user define type) and filling data types for computer programming CLO.4 Able to use computational techniques and modern computer tools (high language) to apply commands in computer programming CLO.5 Able to apply statistical theory and statistical methods using computer programming		PLO-7 PLO-8 PLO-7 PLO-8 PLO-6 PLO-7 PLO-8 PLO-5

Content	This course aims to equip students with knowledge of parts of computers and how computers work. Students are also equipped with the ability to use application software such as spreadsheet processing programs and data management systems using Excel to solve real problems. In addition, students are given the material on the basics of programming algorithms as well as the ability to compile, test and run programs in C++ language and then apply them to solve simple statistics problems. The material is delivered through interactive lectures, discussions, exercises, practicums, and Problem Based Learning. Computer programming are computational courses. This course aims to allow students to create simple programs with object- oriented programming languages to solve statistical problems. The learning strategy to achieve the objectives of giving this course is a discussion and explanation of the basics of programming and practicum directly by making a program from the given case. Students are also expected to demonstrate and explain the programs that have been created.
Assessment and its weight	Case Study I – 25% Midterm Exam – 25% Final Exam – 25% Case Study – 25%
Media employed	LCD, whiteboard, websites (myITS Classroom), zoom
Reading list	<ol style="list-style-type: none"> 1. Pozrikidis,C., 2007. Introduction to C++ Programming and Graphics. Springer Science + Business Media 2. Bielajew, A., F., 2002. Introduction to Computers and Programming Using C++ and MATLAB. Department of Nuclear Engineering and Radiological Sciences, University of Michigan 3. Deskripsi Singkat MK/ <i>Course Description</i>	Mata kuliah ini bertujuan untuk membekali mahasiswa dengan pengetahuan tentang dasar-dasar pemrograman dengan menggunakan software modern (high language). Mahasiswa juga dibekali kemampuan untuk Menyusun, menguji dan menjalankan program dengan software modern (high language) kemudian mengaplikasikannya pada teori dan metode statistika. Selain itu, mahasiswa diberi materi untuk melakukan manajemen data menggunakan struktur data yang didefinisikan sendiri pada software. Materi disampaikan melalui ceramah interaktif, diskusi, latihan, praktikum serta Problem Based Learning. Program komputer merupakan mata kuliah bidang komputasi. Mata kuliah ini bertujuan agar mahasiswa bisa membuat program sederhana dengan bahasa pemrograman yang berorientasi pada objek untuk menyelesaikan permasalahan statistika. Strategi pembelajaran untuk mencapai tujuan pemberian mata kuliah ini adalah diskusi dan penjelasan tentang dasar-dasar pemrograman																														

	<p>serta praktikum secara langsung dengan membuat program dari kasus yang diberikan. Mahasiswa juga diharapkan bisa mendemokan dan menjelaskan program yang sudah dibuat.</p> <p><i>This course aims to equip students with knowledge of parts of computers and how computers work.
