# MODULE HANDBOOK

## ACTUARY

Module name	ACTUARY	
Module level	Undergraduate	
Code	SS234635	
Course (if applicable)	ACTUARY	
Semester	6	
Person responsible for the module	Dr. Ir. Setiawan, M.S.	
Lecturer	Dr. Ir. Setiawan, M.S. Dr. Drs. Agus Suharsono, M.S. Dr. Muhammad Sjahid Akbar, S.Si, M.Si	
Language	Bahasa Indonesia and English	
Relation to curriculum	Undergraduate degree program, elective, 6th semester.	
Type of teaching, contact hours	Non SCL (100%)	
Workload	1. Lectures [L] : 3 x 50 = 150 minutes per week. 2. Exercises and Assignments [EA] : 3 x 60 = 180 minutes (3 hours) per week. 3. Independent learning [IL]: 3 x 60 = 180 minutes (3 hours)perweek.	
Credit points	3 credit points (SKS) Equivalent to 4.8 ECTS	
Requirements according to the examination regulations	A student must have attended at least 80% of the lectures to sit in the exams.	
Mandatory prerequisites	Regression Analysis	
Learning outcomes and their corresponding PLOs	CLO.1 Able to understand and apply financial mathematical concepts and opportunities to analyze problems in life insurance CLO.3 Able to analyze data by applying mathematics and statistics in insurance CLO.4 Able to identify, formulate, and solve statistical problems in the insurance industry CLO.6 Have knowledge of current and upcoming issues related to insurance midwives CLO.7 Able to communicate effectively and work together in interdisciplinary and multidisciplinary teams CLO.8 Have professional responsibilities and ethics CLO.9 Able to motivate yourself to think creatively and learn throughout life	PLO-1 PLO-3 PLO-4 PLO-9

Content	Actuarial is one of the courses in the field of Economics, Finance and Actuarial which has one of the fields of study determining premiums, policies, and insurance reserves. The purpose of studying Actuarial is to understand and apply the mathematical concepts of finance and the opportunity to analyze problems in life insurance. The topics that will be studied include survival function, living and selective tables, insurance benefits, living annuities, premium value calculations, policy value calculations, and reserves.
Assessment and its weight	Assignment – 20% Quiz I – 10% Midterm Exam – 20% Quiz II – 25% Final Exam– 25%
Media employed	LCD, whiteboard, websites (myITS Classroom), zoom
Reading list	<ol style="list-style-type: none"> <li>1. Gupta, A.K., Varga, T., (2002), An Introduction to Actuarial Mathematics, Springer, USA Lyun, Yuh-Dueh. (2002). <i>Financial Engineering and Computation, Principles, Mathematics, Algorithms</i>. Cambridge.</li> <li>2. Cunningham, R., Herzog, T. and R. London,( 2006), Models for Quantifying Risk, 3rd edition</li> </ol>

<p><b>Deskripsi Singkat MK/ Course Description</b></p>	<p>Aktuaria merupakan salah satu mata kuliah di bidang Ekonomi, Finansial dan Aktuaria yang mempunyai salah satu bidang kajian menentukan premi, polis dan cadangan asuransi. Tujuan mempelajari Aktuaria adalah untuk memahami dan menerapkan konsep-konsep matematika keuangan dan peluang untuk menganalisa masalah dalam asuransi jiwa. Topik-topik yang akan dipelajari diantaranya : fungsi survival, tabel hidup dan selektif, insurance benefit, anuitas hidup, perhitungan nilai premi, perhitungan nilai polis, dan cadangan.</p> <p><i>Actuarial is one of the courses in the field of Economics, Finance and Actuarial which has one of the fields of study determining premiums, policies, and insurance reserves. The purpose of studying Actuarial is to understand and apply the mathematical concepts of finance and the opportunity to analyze problems in life insurance. The topics that will be studied include survival function, living and selective tables, insurance benefits, living annuities, premium value calculations, policy value calculations, and reserves.</i></p>
