MODULE HANDBOOK

INTRODUCTION TO META ANALYSIS

Module name	INTRODUCTION TO META ANALYSIS		
Module level	Undergraduate		
Code	SS234757		
Course (if applicable)	INTRODUCTION TO META ANALYSIS		
Semester	7		
Person responsible for the module	Prof. Dr. Bambang Widjanarko Otok, M.Si		
Lecturer	Prof. Dr. Bambang Widjanarko Otok, M.Si. Santi Wulan P, M.Si, Ph.D		
Language	Bahasa Indonesia and English		
Relation to curriculum	Undergraduate degree program, elective, 7th semester.		
Type of teaching, contact hours	Other SCL Methods (31,25%); Non SCL (68,75%)		
Workload	1. Lectures [L]: $3 \times 50 = 150$ minutes per week. 2. Practicum [P]: $3 \times 45 = 135$ minutes per week. 3. Exercises, Assignments [EA]: $3 \times 60 = 180$ minutes per week. 4. Independent Learning [IL]: $3 \times 60 = 180$ minutes per week.		
Credit points	3 credit points (SKS) Equivalent to 4.8 ECTS		
Requirements according to the examination regulations	A student must have attended at least 80% of the lectures to sit in the exams.		
Mandatory prerequisites	Regression Analysis, Categorical Data Analysis		
Learning outcomes and their corresponding PLOs	CLO.1 Able to apply knowledge of statistical, mathematical, and computational theories related to the concept of meta analysis CLO.3 Able to analyze data with appropriate statistical methods and interpret them CLO.4 Able to identify, formulate, and solve statistical problems in various applied fields		PLO-6 PLO-7 PLO-10
Content	Meta Analysis is one of the expertise courses that is part of the field of study in the Environmental and Health Statistics course family. The purpose of studying Meta Analysis is that students are able to understand the basic concepts and statistical methods for meta analysis, as well as strategies for interpreting the results of meta analysis on a real problem, both in its development and application. Through this course, it is hoped that students will have the learning experience to think critically and be able to give the right decisions about the appropriate metaanalysis method on a problem and its		

	solution. The learning strategies used are discussions and exercises and tasks.
Assessment and its weight	Assignment & Test I – 20% Midterm Exam – 30% Assignment & Test II – 20% Final Exam– 30%
Media employed	LCD, whiteboard, websites (myITS Classroom), zoom

Deskripsi Singkat MK/ <i>Course Description</i>		<p>Meta Analisis merupakan salah satu mata kuliah keahlian yang merupakan bagian dari bidang kajian dalam rumpun mata kuliah Statistik Lingkungan dan Kesehatan. Tujuan mempelajari Analisis Meta adalah mahasiswa mampu memahami konsep dasar dan metode-metode statistik untuk meta analysis, serta strategi untuk menginterpretasikan hasil meta analysis pada suatu problem riil, baik dalam pengembangan dan penerapannya. Melalui mata kuliah ini diharapkan mahasiswa akan memiliki pengalaman belajar untuk berpikir secara kritis dan mampu memberikan keputusan yang tepat tentang metode meta analysis yang sesuai pada suatu permasalahan dan penyelesaiannya. Strategi pembelajaran yang digunakan adalah diskusi dan latihan serta tugas.</p> <p><i>Meta Analysis is one of the expertise courses that is part of the field of study in the Environmental and Health Statistics course family. The purpose of studying Meta Analysis is that students are able to understand the basic concepts and statistical methods for meta analysis, as well as strategies for interpreting the results of meta analysis on a real problem, both in its development and application. Through this course, it is hoped that students will have the learning experience to think critically and be able to give the right decisions about the appropriate metaanalysis method on a problem and its solution. The learning strategies used are discussions and exercises and tasks.</i></p>

(1)	(2)	(3)	Indikator <i>Indicator</i>	Kriteria & Bentuk <i>Criteria and Format</i>	Luring <i>Offline</i>	Daring <i>Online</i>							

1	Dapat menjelaskan statistic dasar yang berhubungan dengan meta analisis dan perhitungan secara lengkap meta analisis <i>Can explain basic statistics related to meta analysis and calculation in full meta analysis</i>	1. Mengetahui penerapan metode analisis meta di permasalahan riil (konsep dasar statistika) 2. Mampu menghitung konsep matriks yang sering digunakan dalam meta analisis <i>1.Knowing the application of meta analysis methods in real problems (basic concepts of statistics)</i> <i>2.Able to calculate matrix concepts that are often used in meta analysis</i>	Observasi di kelas <i>Observation in the classroom</i>	Ceramah Interaktif, Diskusi, Latihan Soal, Seminar <i>Interactive Lectures</i> <i>Discussion</i> <i>Exercise</i> <i>Seminar</i> TM: 3x50" LT: 3x60" BM: 3x60"		1. Mengetahui penerapan analisis meta di permasalahan riil. 2. Dapat membedakan antara data univariat dan data multivariat. <i>1. Knowing the application of meta analysis in real problems.</i> <i>2. Can distinguish between univariate data and multivariate data.</i>	10%
2	Dapat menjelaskan statistic dasar yang berhubungan dengan meta analisis dan perhitungan secara lengkap meta analisis <i>Can explain basic statistics related to meta analysis and calculation in full meta analysis</i>	Mengetahui konsep dari ukuran efek, ukuran presisi dan ukuran efek heterogenitas <i>Knowing the concept of effect size, precision measure and heterogeneity effect size</i>	Tugas, Kuis <i>Writing Task, Quiz</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi <i>Interactive Lectures</i> <i>Discussion</i> <i>Practices</i> <i>Exercise</i> <i>Observation</i> TM: 4x3x50" LT: 4x3x60" BM: 4x3x60"		1. Mengetahui konsep Effect Size pada analisis meta 2. Mengetahui konsep Ukuran Presisi pada analisis meta 3. Mengetahui konsep ukuran heterogenitas pada analisis meta <i>1. Knowing the concept of Effect Size in meta analysis</i> <i>2. Knowing the concept of Precision Measure in meta analysis</i> <i>3. Knowing the concept of heterogeneity measures in meta analysis</i>	25%
3	Mengetahui langkah-langkah yang harus dilakukan dalam Meta-analisis untuk mean satu sampel <i>Knowing the steps to</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek pada uji hipotesis rata-rata satu populasi univariat <i>Can determine, calculate and</i>	Tugas, Kuis <i>Writing Task, Quiz</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi		1. Menentukan statistik uji pada hipotesis rata-rata satu populasi, 2. menghitung ukuran efek pada hipotesis rata-rata satu populasi	25%

	<i>perform in Meta -analysis to mean one sample</i>	<i>interpret the size of the effect on the hypothesis test of the average of one univariate population</i>		<i>Interactive Lectures</i> <i>Discussion</i> <i>Practices</i> <i>Exercise</i> <i>Observation</i> TM: 4x3x50" LT: 4x3x60" BM: 4x3x60"		 3. menginterpretasikan ukuran efek pada hipotesis rata-rata satu populasi 1. <i>Determining test statistics on the hypothesis of averaging one population,</i> 2. <i>Calculating the size of the effect on the hypothesis of the average of one population</i> 3. <i>interpreting the size of the effect on the hypothesis of the average of one population</i>	
4	Mengetahui langkah-langkah yang harus dilakukan dalam Meta-analisis untuk mean satu sampel <i>Knowing the steps to perform in Meta -analysis to mean one sample</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran presisi pada uji hipotesis rata-rata satu populasi univariat <i>Can determine, calculate and interpret precision measures on the hypothesis test of the average of one univariate population</i>	Tugas, Kuis <i>Writing Task, Quiz</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi <i>Interactive Lectures</i> <i>Discussion</i> <i>Practices</i> <i>Exercise</i> <i>Observation</i> TM: 4x3x50" LT: 4x3x60" BM: 4x3x60"		1. menghitung ukuran presisi pada hipotesis rata-rata satu populasi 2. menginterpretasikan ukuran presisi pada hipotesis rata-rata satu populasi 1. <i>Calculating precision measures on the hypothesis of averaging one population</i> 2. <i>interpreting precision measures on the hypothesis of the average of one population</i>	25%
5	Mengetahui langkah-langkah yang harus dilakukan dalam Meta-analisis untuk mean satu sampel <i>Knowing the steps to</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek heterogenitas pada uji hipotesis rata-rata satu populasi univariat	Tugas, Kuis <i>Writing Task, Quiz</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi		1. menghitung ukuran heteroge-nitas pada hipotesis rata-rata satu populasi 2. menginterpretasikan ukuran heteroge-nitas	25%

	<i>perform in Meta -analysis to mean one sample</i>	<i>Can determine, calculate and interpret the size of the heterogeneity effect on the hypothesis test of the average of one univariate population</i>		<i>Interactive Lectures Discussion Practices Exercise Observation</i> TM: 4x3x50" LT: 4x3x60" BM: 4x3x60"		pada hipotesis rata-rata satu populasi 1. Calculating precision measures on the hypothesis of averaging one population 2. interpreting precision measures on the hypothesis of the average of one population	
6	Mengetahui langkah-langkah yang harus dilakukan dalam Meta-analisis untuk perbedaan mean dua sampel Effect <i>Knowing the steps to be done in the Meta -analysis for the difference in the mean of two Effect samples</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek dan ukuran presisi pada uji hipotesis rata-rata dua populasi univariat <i>Can determine, calculate and interpret effect measures and precision measures on hypothesis tests of the average of two univariate populations</i>	Observasi di kelas <i>Observation in the classroom</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi <i>Interactive Lectures Discussion Practices Exercise Observation</i> TM: 2x3x50" LT: 2x3x60" BM: 2x3x60"		1. Menentukan statistik uji pada hipotesis rata-rata dua populasi, 2. menghitung ukuran efek dan presisi pada hipotesis rata-rata dua populasi 3. menginterpretasikan ukuran efek dan presisi pada hipotesis rata-rata dua populasi 1. Determining the statistics of the test on the hypothesis of an average of two populations, 2. Calculating the size of the effect and the precision on the hypothesis of the average of two populations 3. interpreting effect size and precision on the hypothesis of the mean of two populations	15%
7	Mengetahui langkah-langkah yang harus dilakukan dalam Meta-	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek heterogenitas pada uji	Observasi di kelas <i>Observation in the classroom</i>	Ceramah Interaktif Diskusi Praktikum		1. menghitung ukuran heteroge-nitas pada hipotesis rata-rata dua	15%

	analisis untuk perbedaan mean dua sampel Effect <i>Knowing the steps to be done in the Meta - analysis for the difference in the mean of two Effect samples</i>	hipotesis rata-rata dua populasi univariat <i>Can determine, calculate and interpret effect measures and precision measures on hypothesis tests of the average of two univariate populations</i>		Latihan Soal Observasi <i>Interactive Lectures Discussion Practices Exercise Observation</i> TM: 2x3x50" LT: 2x3x60" BM: 2x3x60"		populasi 2. menginterpretasikan ukuran heteroge-nitas pada hipotesis rata-rata dua populasi <i>1. Calculating the Heterogeneity Measure on the Hypothesis of the Mean of Two Populations</i> <i>2. interpreting the measure of heterogeneity on the hypothesis of the average of two populations</i>	
8	ETS/Midterm						
8	Dapat menjelaskan Model Fixed Effect pada Meta Analisis <i>Can explain the Fixed Effect Model in Meta Analysis</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek dan presisi pada Model Fixed Effect dengan statistik tertentu <i>Can determine, calculate and interpret effect size and precision on Fixed Effect Models with certain statistics</i>	Observasi di kelas <i>Observation in the classroom</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi <i>Interactive Lectures Discussion Practices Exercise Observation</i> TM: 3x50" LT: 3x60" BM: 3x60"		1. Menentukan estimasi, statistik uji pada model fixed efek, 2. menghitung ukuran efek dan presisi pada model fixed efek 3. menginterpretasikan ukuran efek dan presisi pada model fixed efek <i>1. Determining estimates, test statistics on fixed effect models,</i> <i>2. Calculating Effect Size and Precision in Fixed Effect Models</i> <i>3. interpret effect size and precision in fixed effects models</i>	10%
9							
10	Dapat menjelaskan Model Fixed Effect pada Meta Analisis <i>Can explain the Fixed Effect Model in Meta</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek heterogenitas pada Model Fixed Effect dengan statistik tertentu	Observasi di kelas <i>Observation in the classroom</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi		1. menghitung ukuran heterogenitas pada model fixed efek 2. menginterpretasikan ukuran heterogenitas pada model fixed efek	10%

	Analysis	<i>Can determine, calculate and interpret the size of the heterogeneity effect on the Fixed Effect Model with certain statistics</i>		<i>Interactive Lectures Discussion Practices Exercise Observation TM: 3x50" LT: 3x60" BM: 3x60"</i>		1. <i>Calculating the Size of Heterogeneity in a Fixed Effect Model</i> 2. <i>interpreting the measure of heterogeneity in fixed effects models</i>	
11	Dapat menjelaskan Model Random Effect dan Campuran pada Meta Analisis <i>Can explain Random Effect and Mixed Models in Meta Analysis</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek, presisi dan heterogenitas pada Model Random Effect dan Campuran dengan statistik tertentu pada meta analisis <i>Can determine, calculate and interpret effect size, precision and heterogeneity in Random Effect and Mixed Models with certain statistics on meta analysis</i>	Tugas Tulis, Kuis <i>Writing Task, Quiz</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi <i>Interactive Lectures Discussion Practices Exercise Observation TM: 2x3x50" LT: 2x3x60" BM: 2x3x60"</i>		1. Menentukan estimasi, statistik uji pada model random efek dan campuran, 2. menghitung ukuran efek dan presisi, heterogenitas pada model random efek dan campuran 3. menginterpretasikan ukuran efek dan presisi, heterogenitas pada model random efek dan campuran 1. <i>Determining estimates, test statistics on random models of effects and mixtures,</i> 2. <i>calculate effect size and precision, heterogeneity in random effect and mixed models</i> 3. <i>interpreting effect size and precision, heterogeneity in random effects and mixed models</i>	10%
12	Dapat menjelaskan meta regresi linear <i>Can explain meta linear</i>	Dapat menentukan, menghitung dan menginterpretasikan ukuran efek, presisi dan	Tugas Tulis, Kuis <i>Writing Task, Quiz</i>	Ceramah Interaktif Diskusi Praktikum Latihan Soal		1. Menentukan estimasi, statistik uji pada model regresi linear, 2. menghitung ukuran	10%

	<i>regression</i>	<p>heteroginitas pada Model Regresi linear dengan statistik tertentu pada meta analisis</p> <p><i>Can determine, calculate and interpret effect size, precision and heterogeneity in linear Regression Models with certain statistics on meta analysis</i></p>		<p>Observasi <i>Interactive Lectures</i> <i>Discussion</i> <i>Practices</i> <i>Exercise</i> <i>Observation</i></p> <p>TM: 2x3x50" LT: 2x3x60" BM: 2x3x60"</p>		<p>efek dan presisi serta heteroginitas pada model regresi linear</p> <p>3. menginterpretasikan ukuran efek dan presisi heteroginitas pada model regresi linear</p> <p>1. <i>Determining estimates, test statistics on linear regression models,</i> 2. <i>Calculating Effect Size and Precision and Heterogeneity in Linear Regression Models</i> 3. <i>interpreting effect size and heterogeneity precision in linear regression models</i></p>	
13	<p>Dapat menjelaskan meta regresi logistik</p> <p><i>Can explain meta logistic regression</i></p>	<p>Dapat menentukan, menghitung dan menginterpretasikan ukuran efek, presisi dan heteroginitas pada Model Regresi logistik dengan statistik tertentu pada meta analisis</p> <p><i>Can determine, calculate and interpret effect size, precision and heterogeneity in logistic Regression Models with certain statistics on meta analysis</i></p>	<p>Tugas Tulis, Kuis <i>Writing Task, Quiz</i></p>	<p>Ceramah Interaktif Diskusi Praktikum Latihan Soal Observasi</p> <p><i>Interactive Lectures</i> <i>Discussion</i> <i>Practices</i> <i>Exercise</i> <i>Observation</i></p> <p>TM: 2x3x50" LT: 2x3x60" BM: 2x3x60"</p>		<p>1.
