

POLICIES TO SUPPORT LAND ECOSYSTEM

Institut Teknologi Sepuluh Nopember (ITS) Surabaya has a policy to ensure the conservation, restoration and sustainable use of terrestrial ecosystems associated with the university, in particular forests, mountains and drylands. ITS Surabaya has planned and designed several areas in the campus as green open spaces. Currently, the ratio of green open space in ITS Campus is 87%.

In addition, ITS Surabaya also has a policy to identify, monitor and protect any IUCN Red Listed species and national conservation list species with habits in areas affected by the operation of our university. To conserve the particular species, ITS has several groups of student activities that focus on protecting environment. Some of these groups can be found here: <https://www.its.ac.id/smartecocampus/student-organization/>
