

In the marine sector, ITS has a policy and supports policy on preventing and reducing marine pollution of all kinds, in particular from land-based activities. The policy is supported by several activities of the lecturers and students. ITS are actively involved in the innovation of marine environment protection by doing community engagement activities such as training for waste management to reduce marine pollution from land waste along with Surabaya Master Waste Bank (Yayasan Bank Sampah Induk Surabaya) to Surabaya citizens. ITS also collaborated with the Vice Governor of East Java to discuss and act on the importance of implementing waste management in Surabaya that will affect the marine pollution.

Moreover, ITS also has a policy on waste disposal and monitor the volume of waste generated as well as the amount of waste sent to landfill and recycled. For organic waste, it is processed at the ITS Compost House located on Arif Rahman Hakim Street. The waste generated every day is $\pm 3.5 - 4 \text{ m}^3$ and approximately 90 kg of compost is produced.
