

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

“Much of the world’s economy is based around producing things for consumption. This drives the engine of industry. If we want the world to develop sustainably, we need to understand how to be more responsible at both ends of this cycle. This means promoting resource and energy efficiency, having a sustainable infrastructure, and providing access to basic services for all.”

(THE Impact Rankings)

**455 metric ton**

Amount of waste generated

**368 metric ton**

Amount of waste recycled

**87 metric ton**

Amount of waste sent to landfill

# 12 RESPONSIBLE CONSUMPTION AND PRODUCTION

## OPERATIONAL MEASURES

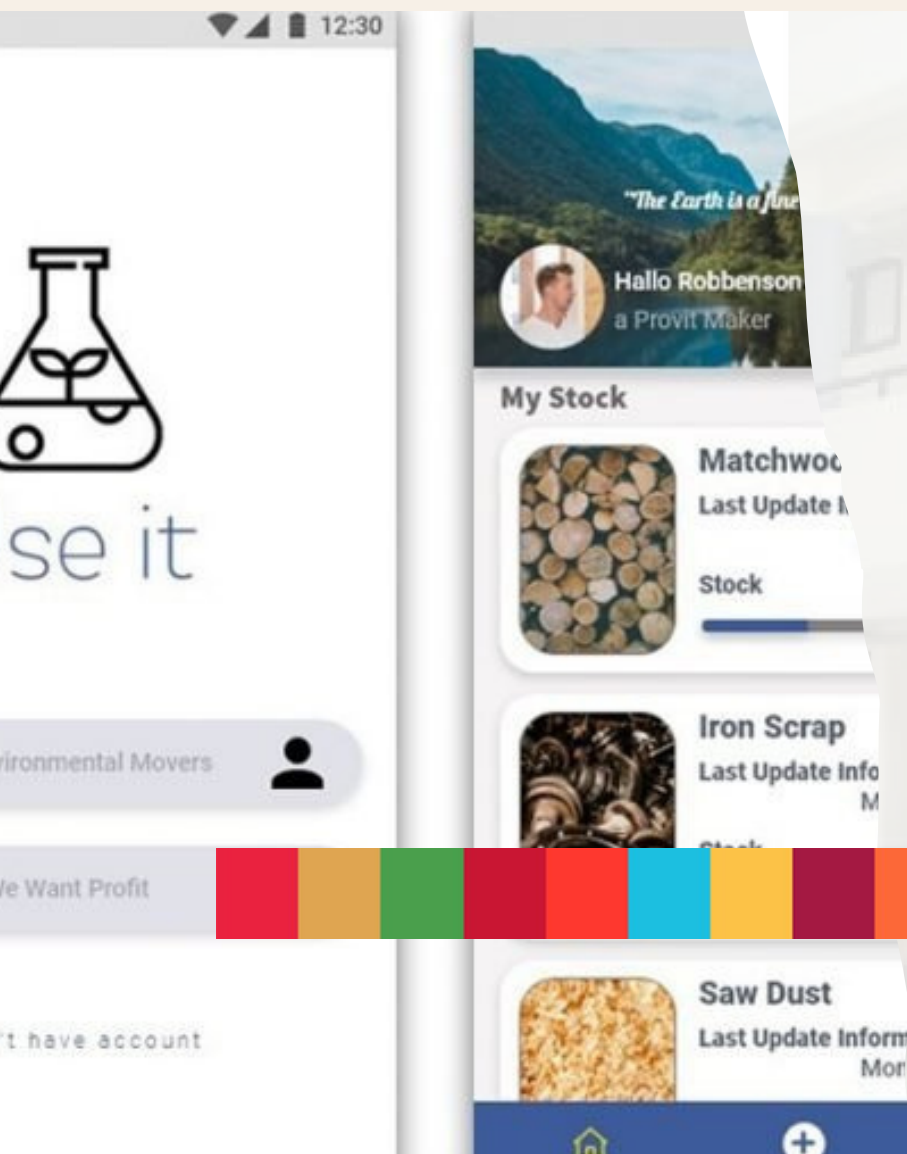

### ITS as a Sustainable and Environmental Friendly Campus

Various efforts have been made by ITS to implement operational measures policies on various aspects. Based on the Circular Letter of ITS Chancellor No. 95007 Year 2019 about ITS' Initiatives towards Sustainable and Environmental Friendly Campus, ITS has made several policies regarding efforts to improve environmental sanitation specifically in part A.1 "Conducting a movement to improve cleanliness in the work environment, both inside and outside the room"; efforts to carry out energy efficiency and conservation specifically in part B.1 "Implementing energy efficiency program by selecting and using energy-efficient and environmentally-friendly electrical equipment"; and efforts to realize environmentally-friendly transportation specifically in section C.7 "Encouraging the improvement of ambient air quality by naming and caring for trees on campus".

## PROPORTION OF RECYLED WASTE

### ITS Helps Reduce Waste by Developing Use It

Actively moving toward realizing ITS as a Sustainable campus and Environmental Friendly Campus, ITS has created an application called USE it which can be used as a platform for buying and selling waste to facilitate industries and society in processing waste in their environment, especially organic and inorganic waste. And also serves to bring together waste collectors with waste processing companies.
