MODULE HANDBOOK

DIGITAL TECHNIQUES AND LABORATORY

Module name	Digital Techniques and Laboratory	
Module level	Undergraduate	
Code	EB184405	
Course (if applicable)	Digital Techniques and Laboratory	
Semester	Fourth Semester (Even)	
Person responsible for the module	Dr. Tri Arief Sardjono, S.T., M.T.	
Lecturer		
Language	Bahasa Indonesia and English	
Relation to curriculum	Undergraduate degree program, mandatory , 4 th semester	
Type of teaching, contact hours	Lectures, <60 students	
Workload	1. Lectures : 4 x 50 = 200 minutes per week. 2. Exercises and Assignments : 4 x 50 = 200 minutes per week. 3. Private learning : 4 x 50 = 240 minutes per week.	
Credit points	4 credit points (sks)	
Requirements according to the examination regulations	A student must have attended at least 75% of the lectures to sit in the exams.	
Mandatory prerequisites	-	
Learning outcomes and their corresponding PLOs	Course Learning Outcome (CLO) after completing this module, CLO 1: Students are able to understand and explain basic theories of digital electronic systems such as the difference between analog systems and digital systems, number systems and coding systems. CLO 2: Students are able to understand and explain about logic gates, Boolean algebra, simplification of logic equations and be able to do experiments related to basic logic gate circuits. CLO 3: Students are able to understand, explain, and analyze combinational logic and be able to do experiment with combinational logic sequences.	PLO-02 PLO-03 PLO-03 PLO-03

	CLO 4: Students are able to understand, explain, explain, and analyze sequential logic and be able to do experiment with sequential logic circuits. CLO 5: Students are able to understand and explain the stages of designing a digital-based Programmable Logic Device (PLD) system and be able to realize it.	PLO-05
Content	This course is a mandatory course that discuss the basic science of digital system both in theory and practice. This course aims to make students understand about number system theory, logic gates, combinational circuits, multivibrator circuits, sequential circuits, and programmable logic devices and their applications. In addition, this course also aims to allow students to experiment on the theory that has been studied and understood, so that students can be trained and skilled in performing analysis, designing digital systems and using tools or tools with the correct procedures. With the understanding of theory and skills in the laboratory, students are expected to be able to apply it especially to biomedical disciplines.	
Study and examination requirements and forms of examination	• In-class exercises • Assignment 1, 2, 4, 5, 6, 7, 8 • Lab work 1, 2, 3, 4 • Mid-term examination • Final examination	
Media employed	LCD, whiteboard, websites (myITS Classroom), zoom.

Capaian Pembelajaran	CPL-PRODI yang dibebankan pada MK PLO Program Charged to The Course					
Learning Outcomes	CPL-02 PLO-02	Mampu menemukan, memahami, menjelaskan, merumuskan, dan menyelesaikan permasalahan umum pada bidang Teknik dan permasalahan khusus pada bidang Teknik Biomedika yang meliputi instrumentasi biomedika cerdas, teknik rehabilitasi medika, pencitraan dan pengolahan citra medika, serta informatika medika Able to find, understand, explain, formulate, and solve general problems in the field of Engineering and special problems in the field of Biomedical Engineering which includes intelligent biomedical instrumentation, medical rehabilitation techniques, imaging and processing of medical images, and medical informatics				
	CPL-03	Mampu merancang dan melaksanakan eksperimen laboratorium dan/atau lapangan, menganalisa dan menginterpretasi data, serta menggunakan penilaian yang obyektif untuk menarik kesimpulan				

	PLO-03	<i>Able to design and implement laboratory experiment and / or field experiments, analyze and interpret data, and use objective assessments to draw conclusions.</i>
	CPL-05	Mampu mendesain komponen, sistem, dan proses dalam bidang Teknik Biomedika yang sistematis, logis, dan realistis sesuai dengan spesifikasi yang ditentukan dengan mempertimbangkan aspek keselamatan, sosial, budaya, lingkungan, dan ekonomi dengan mengenal/memanfaatkan sumber daya lokal dan nasional dengan wawasan global
	PLO-05	<i>Able to design components, systems, and processes in the field of Biomedical Engineering that are systematic, logical, and realistic appropriate with specified specifications by considering aspects of safety, social, cultural, environmental, and economic by recognizing / utilizing local and national resources with global insight</i>
Capaian Pembelajaran Mata Kuliah (CPMK) – Bila CP MK sebagai kemampuan pada tiap tahap pembelajaran CP MK = Sub CP MK Course Learning Outcome (CLO) - If CLO as description capability of each Learning Stage in the course, then CLO = LLO		
	CP MK 1	Mahasiswa mampu memahami dan menjelaskan teori dasar sistem elektronika digital seperti perbedaan antara sistem analog dan sistem digital, sistem bilangan dan sistem pengkodean.
	CLO 1	<i>Students are able to understand and explain basic theories of digital electronic systems such as the difference between analog systems and digital systems, number systems and coding systems.</i>
	CP MK 2	Mahasiswa mampu memahami dan menjelaskan tentang gerbang logika, aljabar boolean, penyederhanaan persamaan logika serta mampu melakukan eksperimen berkaitan dengan rangkaian dasar gerbang logika.
	CLO 2	<i>Students are able to understand and explain about logic gates, Boolean algebra, simplification of logic equations and be able to do experiments related to basic logic gate circuits.</i>
	CP MK 3	Mahasiswa mampu memahami, menjelaskan, merancang dan menganalisa rangkaian logika kombinasional serta mampu melakukan eksperimen berkaitan dengan rangkaian logika kombinasional.
	CLO 3	<i>Students are able to understand, explain, design and analyze a combination of combinational logic and are able to experiment with a combination of combinational logic.</i>
	CP MK 4	Mahasiswa mampu memahami, menjelaskan, merancang dan menganalisa rangkaian logika sekuensial serta mampu melakukan eksperimen berkaitan dengan rangkaian logika sekuensial.
	CLO 4	<i>Students are able to understand, explain, design and analyze sequential logic circuits and be able to do experiments related to sequential logic circuits.</i>

	CP MK 5 CLO 5	Mahasiswa mampu memahami dan menjelaskan tahapan perancangan sistem berbasis digital <i>Programmable Logic Device</i> (PLD) serta mampu merealisasikannya. <i>Students are able to understand and explain the stages of designing a digital-based Programmable Logic Device (PLD) system and be able to realize it.</i>

Diskripsi Singkat MK Short Description of Course	Mata kuliah Teknik Digital dan Laboratorium merupakan mata kuliah wajib yang membahas ilmu dasar sistem digital baik secara teori maupun praktek. Mata kuliah ini bertujuan agar mahasiswa memahami tentang teori sistem bilangan, gerbang logika, rangkaian kombinasional, rangkaian multivibrator, rangkaian sekuensial, dan programmable logic decvice serta aplikasinya. Selain itu, mata kuliah ini juga bertujuan agar mahasiswa mampu melakukan eksperimen mengenai teori yang sudah dipelajari dan dipahami, sehingga mahasiswa bisa terlatih dan terampil dalam melakukan analisa, perancangan sistem digital serta menggunakan peralatan atau tools dengan prosedur yang benar. Dengan pemahaman teori dan keterampilan dalam laboratorium tersebut, mahasiswa diharapkan mampu menerapkannya terutama pada disiplin ilmu biomedik. <i>This course is a mandatory course that discuss the basic science of digital system both in theoru and practice. This course aims to make students understand about number system theory, logic gates, combinational circuits, multivibrator circuits, sequential circuits, and programmable logic decvices and their applications. In addition, this course also aims to allow students to experiment on the theory that has been studied and understood, so that students can be trained and skilled in performing analysis, designing digital systems and using tools or tools with the correct procedures. With the understanding of theory and skills in the laboratory, students are expected to be able to apply it especially to biomedical disciplines.</i>

8	Evaluasi Tengah Semester Mid Exam	Tes: Ujian Tulis/Ujian Daring Test: Writing Exams / Online Exams	20
10-12	Sub CP-MK 4: Mahasiswa mampu memahami, menjelaskan, merancang dan menganalisa rangkaian logika sekuensial serta mampu melakukan eksperimen berkaitan dengan rangkaian logika sekuensial. LLO 4: <i>Students are able to understand, explain, design and analyze sequential logic circuits and be able to do experiments related to sequential logic circuits.</i>	Non tes: Tugas 6: Mengerjakan soal perhitungan mengenai analisa dan perancangan rangkaian bistable, rangkaian monostable (one shot), rangkaian astable, latch, flip-flop, register, counter serta mencari contoh aplikasinya (Tugas Tertulis) Tugas 7: Mengerjakan soal perhitungan mengenai analisa dan perancangan sistem digital menggunakan FSM (Tugas Tertulis) Praktikum 3: Rangkaian sekuensial. Tes : EAS Soal 1 (10% dari EAS 20%) Non-test: Task 6: Solve calculation problems regarding the analysis and design of bistable circuits, monostable circuits (one shot), astable circuits, latches, flip-flops, registers, counters and looking for examples of their application (Written task) Task 7: Solve calculation problems regarding digital system analysis and design using FSM (Written task)	Tugas 6 / Task 6: 2.5 Tugas 7 / Task 7: 2.5 Praktikum 3 / Lab work 3: 10

		Lab work 3: <i>Sequential circuit</i> Test: <i>Question 1 in Final Exam (10% of Mid Exam 20%)</i>	
13-15	Sub CP-MK 5: Mahasiswa mampu memahami dan menjelaskan tahapan perancangan sistem digital berbasis Programmable Logic Device (PLD) serta mampu merealisasikannya. LLO 5: <i>Students are able to understand and explain the stages of designing a digital-based Programmable Logic Device (PLD) system and be able to realize it.</i>	Non-tes : Tugas 8: Mengerjakan soal mengenai analisa dan perancangan sistem digital berbasis PLD (Tugas Tertulis). Praktikum 4: Perancangan sistem digital berbasis PLD Tes : EAS Soal 2 (17.5% dari EAS 35%) Non-test: Task 8: <i>Solve questions regarding the analysis and design of a PLD-based digital system (Written Task).</i> Lab work 4: <i>PLD-based digital system design</i> Test: <i>Question 2 in Final Exam (12.5% of Final Exam 20%)</i>	Tugas 8 / <i>Task 8:</i> 2.5 Praktikum 4 / <i>Lab work 4:</i> 10
16	Evaluasi Akhir Final Exam	Tes: Ujian Tulis/Ujian Daring Test: <i>Writing Exams / Online Exams</i>	20
Total bobot penilaian Total assessment load			100%

Indikator Pencapaian CPL Pada MK / Indicator of PLO achievement charged to the course

CPL yang dibebankan pada MK / PLO charged to the course	CPMK / Course Learning Outcome (CLO)	Minggu ke / Week	Bentuk Asesmen / Form of Assessment	Bobot / Load (%)
CPL-02 / PLO-02	CPMK 1 / CLO 1	Week- 1-2	Task 1	2.5
		Week- 8	Mid Exam question 1	6
CPL-03 / PLO-03	CPMK 2 / CLO 2	Week- 3-5	Task 2	2.5
			Lab Work 1	10
		Week- 8	Mid Exam question 2	7
	CPMK 3	Week- 6,7,9	Task 4	2.5
			Task 5	2.5
			Lab Work 2	10
		Week- 8	Mid Exam question 3	7
	CPMK 4	Week- 10-12	Task 6	2.5
			Task 7	2.5
			Lab Work 3	10
		Week- 16	Final Exam question 1	10
CPL-05 / PLO-05	CPMK 5	Week- 13-15	Task 8	2.5
			Lab Work 4	10
		Week- 16	Final Exam question 2	12.5
