

# MODULE HANDBOOK

## TECHNOLOGY INSIGHT AND APPLICATIONS

Module name	<b>TECHNOLOGY INSIGHT AND APPLICATIONS</b>	
Module level	Undergraduate	
Code	UG184916	
Course (if applicable)	Technology Insight and Applications	
Semester	Seventh Semester (Gasal)	
Person responsible for the module	Dra. Endang Susilowati, M.Kes	
Lecturer	Ir.Josaphat Pramudijanto, M.Eng.	
Language	Bahasa Indonesia and English	
Relation to curriculum	Undergraduate degree program, <b>mandatory</b> , 7 <sup>th</sup> semester.	
Type of teaching, contact hours	Lectures, <60 students Mondays, 07.00-08.40 (GMT+7)	
Workload	1. Lectures : $2 \times 50 = 100$ minutes per week. 2. Exercises and Assignments : $2 \times 60 = 120$ minutes (2 hours) per week. 3. Private learning : $2 \times 60 = 120$ minutes (2 hours) per week.	
Credit points	3 credit points (skrs)	
Requirements according to the examination regulations	A student must have attended at least 75% of the lectures to sit in the exams.	
Mandatory prerequisites	Prerequisites for taking this course are semester 5 and above (for D3), and semester 6 (for S1)	
Learning outcomes and their corresponding PLOs	Course Learning Outcome (CLO) after completing this module, CLO 1: Students understand the outline of the lecture from the beginning to the implementation of KKN CLO 2: Students are able to change information into something that is simpler to understand CLO 3: Able to create Logframe matrix CLO 4: Have insight and are able to implement the principles of sustainable development according to their field of expertise in solving problems in society and the surrounding environment.	PLO-11  PLO-10  PLO-10 PLO-10

	<p>CLO 5: Able to understand the basics of using technology by optimizing information and communication technology in solving problems in society and its environment.</p> <p>CLO 6: Able to use open source-based information technology to create agency websites.</p> <p>CLO 7: Able to use applied information technology to solve common problems in society</p> <p>CLO 8: Able to develop a cooperative attitude and have social sensitivity and high concern for society and the environment.</p> <p>CLO 9: Students can be part of the solution to problems that exist in community groups</p> <p>CLO 10: Skilled in the use of technology and creativity in solving problems in society and the environment.</p>	PLO-10 PLO-10 PLO-10 PLO-10 PLO-10 PLO-12
Content	<p>Technology Insights and Applications courses will provide inspiration to students in developing insight into science, technology and innovation as well as the forms of their application in society and the environment. As citizens, students will be able to have skills and creativity in comprehensively utilizing technology. During the recovery process, students develop a thinking pattern based on a constructive information transformation thinking model with a systemic logframe matrix, by leveraging open source technology and mobile applications. Starting from observing problems, exploring problems to finding effective forms of solutions that allow concrete solutions to be achieved. In developing forms of problem solving in the community based on the principle of sustainable development. Strengths that are prioritized to be increased in the application of information and communication technology accompanied by increased social sensitivity so that they become more adaptive individuals in working together to achieve the target of solving problems in society. The ability to observe and interview in the field also supports the skills given to students so that factual data in the field can be used optimally.</p> <p>Towards the end of lectures, students are able to optimally design a Real Work Lecture (KKN) proposal based on field facts. By utilizing ICT and involving the skills that each student has according to their scientific background creatively for the benefit of development in society and the environment. At the end of the lecture, students carry out a Thematic Field Work Practice (KKN) that emphasizes capacity building in the community. So that students as intelligent people need to be given the opportunity to be and be part of the solution to problems that exist in society.</p>	

Study and examination requirements and forms of examination	<ul style="list-style-type: none"> <li>● Mid-term examination</li> <li>● Discussion and Presentation</li> <li>● Community Service Program Report</li> </ul>

	(Dra. Endang Susilowati, M.Kes)			(M. Hilman Fatoni, S.T., M.T.)		(Dr. Achmad Arifin, S.T., M.Eng.)							
<b>Capaian Pembelajaran  Learning Outcomes</b>	<b>CPL-PRODI yang dibebankan pada MK PLO Program Charged to The Course</b>												
	CPL-10  PLO-10	Mampu <b>menerapkan</b> prinsip-prinsip teknologi dan <b>kemampuan manajerial</b> untuk dapat <b>berkarya</b> di bidang Teknik Biomedika maupun dalam kehidupan bersama di masyarakat pada tingkat nasional dan internasional <i>Able to apply the principles of technology and managerial ability to be able to work in the field of Biomedical Engineering as well as in community life in the national and international level</i>											
	CPL-11  PLO-11	Mampu <b>memahami</b> kebutuhan akan pembelajaran sepanjang hayat <i>Able to understand the need for lifelong learning</i>											
	CPL-12  PLO-12	Mampu <b>bersikap</b> dan <b>berperilaku</b> religius, nasionalis, saling menghormati, mandiri, dan gigih <i>Able to behave and act religiously, nationally, respectfully, independently, and persistently</i>											
	<b>Capaian Pembelajaran Mata Kuliah (CPMK) Course Learning Outcome (CLO) - If CLO as description capability of each Learning Stage in the course, then CLO = LLO</b>												

	<b>CP MK 1</b> <b>CLO 1</b>	Mahasiswa paham mengenai garis besar perkuliahan dari awal sampai pelaksanaan KKN. <i>Students understand the outline of the lecture from the beginning to the implementation of KKN</i>
	<b>CP MK 2</b> <b>CLO 2</b>	Mahasiswa mampu merubah informasi menjadi sesuatu yang lebih sederhana untuk dipahami <i>Students are able to change information into something that is simpler to understand</i>
	<b>CP MK 3</b> <b>CLO 3</b>	Mampu membuat matrik Logframe <i>Able to create Logframe matrix</i>
	<b>CP MK 4</b> <b>CLO 4</b>	Memiliki wawasan dan mampu mengimplementasikan prinsip pembangunan berkelanjutan sesuai bidang keahliannya dalam menuntaskan persoalan di masyarakat serta lingkungan sekitarnya. <i>Have insight and are able to implement the principles of sustainable development according to their field of expertise in solving problems in society and the surrounding environment.</i>
	<b>CP MK 5</b> <b>CLO 5</b>	Mampu memahami dasar-dasar penggunaan teknologi dengan mengoptimalkan teknologi informasi dan komunikasi dalam menyelesaikan persoalan di masyarakat dan lingkungannya. <i>Able to understand the basics of using technology by optimizing information and communication technology in solving problems in society and its environment.</i>
	<b>CP MK 6</b> <b>CLO 6</b>	Mampu menggunakan teknologi informasi berbasis open source untuk membuat website instansi. <i>Able to use open source-based information technology to create agency websites.</i>
	<b>CP MK 7</b> <b>CLO 7</b>	Mampu menggunakan teknologi informasi terapan untuk menyelesaikan permasalahan-permasalahan umum di masyarakat <i>Able to use applied information technology to solve common problems in society</i>
	<b>CP MK 8</b> <b>CLO 8</b>	Mampu mengembangkan sikap berkerja sama dan memiliki kepekaan sosial serta kepedulian yang tinggi di masyarakat dan lingkungan. <i>Able to develop a cooperative attitude and have social sensitivity and high concern for society and the environment.</i>
	<b>CP MK 9</b> <b>CLO 9</b>	Mahasiswa bisa menjadi bagian dari solusi atas permasalahan yang ada di kelompok masyarakat. <i>Students can be part of the solution to problems that exist in community groups.</i>
	<b>CP MK 10</b> <b>CLO 10</b>	Terampil dalam penggunaan Teknologi dan memiliki kreativitas dalam rangka memecahkan persoalan yang ada di masyarakat dan lingkungan. <i>Skilled in the use of technology and creativity in solving problems in society and the environment.</i>

<b>Diskripsi Singkat MK</b>														
<b>Short Description of Course</b>	Mata Kuliah Wawasan dan Aplikasi Teknologi akan memberikan inspirasi kepada mahasiswa dalam mengembangkan wawasan ilmu pengetahuan, teknologi dan inovasi serta bentuk aplikasinya di masyarakat dan lingkungan. Sebagai warga negara, mahasiswa nantinya mampu memiliki ketrampilan dan kreativitas dalam mendayagunakan teknologi secara komprehensif. Selama proses perkuliahan, mahasiswa mengembangkan pola berpikir didasari model berpikir transformasi informasi dengan matrik logfrem sistemik secara konstruktif, dengan mendaya gunakan Teknologi Opensource dan Aplikasi mobile. Mulai dari melakukan observasi terhadap masalah, eksplorasi masalah hingga mencari bentuk pemecahan efektif yang memungkinkan tercapai penyelesaian yang konkret. Dalam mengembangkan bentuk penyelesaian persoalan di masyarakat didasari oleh prinsip pembangunan berkelanjutan. Kekuatan yang diutamakan untuk ditingkatkan dalam penerapan teknologi informasi dan komunikasi yang disertai peningkatan kepekaan sosial sehingga menjadi pribadi yang lebih adaptif dalam bekerjasama mencapai target penyelesaian persoalan di masyarakat. Kemampuan observasi dan wawancara di lapangan juga mendukung ketrampilan yang diberikan kepada mahasiswa sehingga data faktual di lapangan dapat dimanfaatkan secara optimal. Menjelang akhir perkuliahan, mahasiswa mampu merancang proposal Kuliah Kerja Nyata (KKN) yang didasari fakta lapangan secara optimal. Dengan mendayagunakan TIK dan melibatkan keahlian yang telah dimiliki masing-masing mahasiswa sesuai latar belakang keilmuannya secara kreatif untuk kepentingan pembangunan di masyarakat dan lingkungan. Pada Akhir perkuliahan, mahasiswa melaksanakan praktik Kuliah Kerja Lapangan (KKN) Tematik yang mengedepankan pada Capasity building pada masyarakat. Sehingga mahasiswa sebagai insan cerdas perlu untuk diberi kesempatan, berada dan menjadi bagian solusi atas permasalahan yang ada di masyarakat.													

	<p><i>model with a systemic logframe matrix, by leveraging open source technology and mobile applications. Starting from observing problems, exploring problems to finding effective forms of solutions that allow concrete solutions to be achieved.
