

2019

## SIDI CONFERENCE

There are thousands of small islands scattered in our planet, including those in the Pacific, Indian Ocean, also in East & South East Asian waters. Indonesia represents such an archipelagic portrait with its over 17,000 islands, where 3,000 of them are inhabited. Most of those small islands are rich of natural resources and biodiversity. Marine tourism and fishery have become main income for people living on those islands.

Nevertheless, those small islands are exposed to many challenges, from climate change till disasters, from poverty till poor healthcare and education, from energy till environmental hazards, from sovereignty till piracy. This SIDI Conference aims to be a platform to exchange ideas and views, in order to enhance the development of those islands in a sustainable way.

## THE TOPICS

- Biodiversity and marine tourism
- Environment and fishery
- Traditional shipping and small island connectivity
- Connectivity, micro business and e-commerce
- Food security and transportation
- ICT, technology selection and remoteness
- Energy provision, limited resources and life quality
- Ocean protection and livability, survivability
- Housing and waste management
- Healthcare and local wisdom
- Employability and education
- Security and sovereignty
- Brain drain and poverty

"EMPOWERING SMALL ISLANDS IN A SUSTAINABLE WAY"

## KEYNOTE SPEAKERS

Dr. Ir. Arief Yahya, M.Sc.  
Minister of Tourism of Indonesia

Prof. Dr. rer. nat. Norbert Grünwald  
Wismar University of Applied Sciences

Prof. Raoul Bunschoten  
Technische Universität Berlin

Prof. Ir. Eko Budi Djatmiko, M.Sc., Ph.D.  
Institut Teknologi Sepuluh Nopember
